Barr's Pure Lawn Grass Seeds

Produce Beautiful Smooth Lawns, Tennis Courts, Putting Greens, Bowling Greens, Cricket and Croquet Grounds, etc.

Renovate Lawns in September, after the wear of Summer.

The following Mixtures of Grass Seeds are composed of thoroughly cleaned seeds of highest quality only, and contain neither Clover nor coarse Grasses; they cannot fail to give the greatest satisfaction. The seed is sold by weight, as being the only correct method of estimating the quantity needed for a given space.

Sow 50 to 100 lbs. per acre, or 1 lb. to every 50 square yards, if the ground is required to be covered quickly, and for renovating bald patches, or where the grass is thin or poor, especially after a summer's hard wear and under trees, sow $\frac{1}{2}$ lb. to every 50 square yards.

Leaflet on the Management of Lawns free on application.

Barr's Dwarf Mixture of Evergreen Grasses for Extra Fine Smooth Lawns, Tennis Courts, Bowling Greens, Cricket Pitches, Putting Greens, etc. a special mixture of the finest-leaved and dwarfest-growing perennial grasses, which from their fine, close, slow habit of growth and pleasing colour are best suited for forming lawns of the shortest and finest herbage, and thus greatly economising labour in mowing.

Per lb. 2s. 3d.; 10 lb. for 21s. 6d.; 20 lb. for 42s.

Barr's "Standard" Evergreen Grasses, for Garden Lawns, Tennis Courts, Bowling Greens, Cricket Pitches, Putting Greens, etc. This mixture is composed principally of the fine-leaved dwarf-growing grasses, all the seeds being highly cleaned and of pure and genuine quality. Per lb. 1s. 10d.; 10 lb. for 17s. 6d.; 20 lb. for 34s.

Barr's "Thames Embankment" Evergreen Grasses for Parks, Recreation Grounds, Golf Courses, Cricket, Hockey, and Polo Fields, also Archery Grounds, etc. a special mixture which has been found very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country; also a good mixture for town lawns where a quick growth is required; the seeds are all highly cleaned and of pure and genuine quality. Per lb. 1s. 3d.; 10 lb. for 12s. 3d.; 20 lb. for 24s.

Barr's "Golf Course" Mixture. A special mixture of good hard-wearing grasses suitable for the fairway of Golf Courses; the seeds have all been highly cleaned and are of pure and genuine quality. Per bushel (28 lb.) 2s.; 10 lb. for 9s. 6d.; per lb. 1s.

Barr's Special Mixture of Evergreen Grasses for sowing under Trees, and for Town Gardens. This mixture contains a careful selection of those grasses most suitable for sowing under trees or in shady places. Per lb. 2s. 6d.

Fine-leaved Fescue Grass (*Festuca ovina tenuifolia*), for sowing where little bulbs are to be naturalised, such as Narcissi Cyclamincus, Minimus, etc.; also Scillas, Chionodoxas, Snowdrops, etc. Per lb. 2s. 6d.

VELVETY GRASS PATHS.

A charming feature in well-laid-out Spring gardens are **close velvety grass walks**. They are soft to walk upon, restful to the eye, and provide a delightful contrast to the colours in the flower border. **Our Special Grass Seed for paths** has been found a great success. Per lb. 2s.; 10 lb. for 18s.

CLOVER.

No Clover is included in the above mixture of Grasses, as we consider a lawn should consist of Grass only.

• If Clover is desired, however, it may be added to the Grass Seeds at the rate of 2 or 3 lb. per acre.

FINEST WHITE DUTCH CLOVER. Per lb. 2s. 6d.

Barr's Special Lawn Phytobroma.

The best manure for Grass Lawns, Tennis Courts, Bowling Greens, Golf Links, etc.

Apply Spring and Autumn, using 2 oz. to the square yard at each application.

Barr's Lawn Phytobroma is composed of those ingredients calculated to encourage a vigorous growth of grass only, and in this respect differs from the potash manures, which are apt to stimulate clovers and coarse weeds. We can confidently recommend it for all grass-lands, as, by its use, a thicker growth and a richer colour will be obtained. It is a highly concentrated manure, and is therefore economical in use, a small quantity only being required at each application. *Circular with fuller particulars sent on application.*

Nett Prices—2 lb. tin, 1s.; In bags—7 lb., 2s. 6d.; 14 lb., 4s. 6d.; 28 lb., 8s.; 56 lb., 13s. 6d.; 1 cwt 26s.

Prepaid Orders for 28 lb. and upwards sent Carriage Paid to any station in Great Britain or to any port on the Irish Coast.

Autumn Bulb Catalogue.

We have been awarded at the principal Flower Shows in London, Birmingham, etc., for our Exhibits of Spring-flowering Bulbs, 74 Gold Medals, Three Challenge Cups, and 32 Silver and Silver-Gilt Cups, also many First-Class Certificates and other high awards.

A few Practical Hints on Bulb Culture.

Culture for Spring-flowering Bulbs out of Doors.

Proper Condition of Soil.—Plant bulbs only when the ground is in a nice friable state, and never when the soil is wet and sticky ; in such cases plant later when the soil is in a good friable condition. After digging or trenching, the ground should be allowed to settle at least ten days before planting.

Depth to Plant.—Many amateurs commit the fault of planting bulbs too deeply (crocuses especially), and consequently have failures. A good general rule to follow is to cover the bulb with soil once and a half to twice its own depth, but not more, *measuring the bulb from base to shoulder*. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil. Crocuses should be planted still shallower. These remarks do not apply to *Erythronium*, *Tulips*, and *Snowdrops*, for which special directions are given.

Manure for Bulbs.—The ammonia in fresh stable manure is fatal to bulbs and is often the cause of failure in growing *Tulips*, etc., therefore only well-decayed stable or cow manure, or the material from an exhausted hot-bed, should be used, and then we recommend VAPORITE (see page 96) being mixed with it so as to destroy any injurious insect life it may contain. The safest manures for all bulbs growing outdoors is PHYTOBROMA or BASIC SLAG for heavy soils, and CRUSHED BONES for light and sandy soils. The PHYTOBROMA should be applied at the rate of 8 cwt. per acre, or 3 oz. per square yard, early in spring, when top growth is showing ; BASIC SLAG OR CRUSHED BONES should be put in the ground with the bulbs at the time of planting, the former at the rate of 1 ton per acre, or $7\frac{1}{2}$ oz. per square yard, and the latter at the rate of 6 cwt. to the acre, or 2 oz. to the square yard, and after planting, sprinkle on the surface of the ground SULPHATE OF POTASH at the rate of 2 cwt. per acre or $\frac{3}{4}$ oz. per square yard. Where basic slag or crushed bones are used, PHYTOBROMA may also be given at the rate of 2 oz. to the square yard in spring, when top growth is showing. On hot dry and sandy soils, old stable manure (treated with Vaporite) may with advantage be used, to act as a sponge to hold moisture in the soil ; it should be dug in 15 to 18 inches deep, so as not to come in contact with the bulbs. *Price List of Manures will be found on page 96.*

Top Dressing.—Where possible, we advise a top dressing to all bulbs through the winter months of some light material such as long straw litter, cut heather, cut furze branches, or PEAT-FIBRE. The advantage of this light covering is that it keeps the surface soil sweet by preventing the heavy winter rains from beating down the earth's crust ; it also protects any early top growth.

Lifting and Replanting.—When bulbs are lifted they should not, if possible, be replanted on the same ground, but where other bulbs or plants have previously been growing : thus, where *Tulips* have been growing last season, plant *Narcissi* this autumn, and so on.

Culture for Spring-flowering Bulbs in Pots or Boxes.

Time of Potting.—September and October are the best months for potting most Spring-flowering bulbs.

The best compost to use is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand, and not passed through a sieve) and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding $1\frac{1}{2}$ lbs. of bone meal or 1 lb. of Phytobroma to every bushel of soil, which mix well together before using. In all cases the soil used should be fresh and sweet ; *never pot in soil that is wet or sticky*. Our Peat-Fibre, Shell and Charcoal Mixture (see page 96) may also be used ; it is light and cleanly to handle, and is a suitable medium for growing all kinds of spring-flowering bulbs in pots or vases, either for indoor decoration or for cutting.

Sterilising Soil.—In order to destroy all injurious insect life it is a good plan to sterilise potting soil before adding the Phytobroma or bonemeal. We recommend for this purpose the KONDINE SOIL STERILISER, price 40/- (full particulars on application), or small quantities of soil can be easily sterilised in a sack by pouring over it a large kettle of boiling water and then spreading out the soil to dry. This will prevent a great deal of after trouble from worms or insects attacking the bulb roots.

The pots should be carefully washed and allowed to dry before using ; new pots should be well soaked. *Never pot in dirty or wet pots.*

Good drainage should be secured by placing three or more pieces of charcoal (in preference to broken crocks) over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with pieces of charcoal, and a good layer of rough fibrous loam or leaf soil placed at bottom of box to ensure perfect drainage.

Covering the Bulbs.—The larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot, to allow of watering when the bulbs are in growth.

After potting, stand the pots or boxes outside in the open, on a firm bottom such as a bed of gravel or a gravel path to prevent the entrance of worms. They should then be surrounded and completely covered with Peat-Moss Fibre, Cocoa Fibre, or old decayed leaf soil (ashes are dangerous as being

CULTURE OF BULBS IN POTS OR BOXES—continued.

often very poisonous), the top of the pots being 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots or boxes remain buried in this way they will require no watering.

The pots or boxes should remain plunged for about twelve weeks (Roman and Italian Hyacinths rather less), in order that the bulbs may get well rooted, after which portions may be removed indoors in succession, selecting first those which bloom naturally early. Place first in a cold frame, cool greenhouse, or cold sitting-room free from draughts, and keep partially shaded for a few days, giving water gradually. Very weak liquid manure-water may then be given once a week until they come into flower. Those that are wanted in bloom early may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from an insufficient supply of light or air. *On no account should bottom heat be given.* A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed too early, before they have made a sufficient quantity of fibrous roots; they are then at once subjected to heat, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check from draughts to the young top growths.

Pot-Culture of Early Gladioli, Ixias, Sparaxis, Tritonias, Babianas, Calochorti, etc.

These bulbs start early into growth and therefore should not be potted up before the end of October to November. The pots should be plunged up to the rim only (not covered) in a cold frame, and protected with mats during severe frosty weather. There they should remain for about three months, after which the treatment is similar to that for Spring-flowering bulbs.

Culture of Spring-Flowering Bulbs in Vases and Bowls.

**Such as Hyacinths, Tulips, Daffodils, Crocuses, Scillas, Chionodoxas, Snowdrops, etc.,
In Barr's New Peat-Fibre, Shell and Charcoal Mixture.**

A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by using our **Peat-Fibre Mixture** (3s. 6d. per bushel, 1s. per peck); the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to soil for growing bulbs in bowls and vases.

Culture.—Fill the vase or bowl with the **Peat-Fibre Mixture** up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil; the mixture should be shaken down into place after planting and lightly watered, but should not be pressed down tightly, or the bulbs will be forced upwards when root growth commences.

After planting, adopt either of the following plans:—

(a) The bowls may be placed outdoors and covered entirely with Peat-Fibre or Cocoon fibre, leaving them thus for 8 to 12 weeks (Early Roman and Italian Hyacinths rather less), when the bulbs will have made good fibrous roots.

(b) Or the bowls may be plunged in a cold frame, airy cellar, or out-house instead of outdoors; with this treatment, however, it will be necessary to occasionally give water.

(c) A third plan is to place the bowls after potting in a dark or moderately dark *airy* room, cool but not too cold; they must not be placed in a close cupboard or the bulbs will certainly suffer.

In the case of bowls plunged outdoors there will be no need to give any attention in the way of watering, as they will of course have abundance of moisture from the autumn rains. Where, however, the bulbs are not exposed to rain, the bowls should be examined once or twice a week, care being taken that the fibre mixture is kept uniformly damp; but for the first week or two after planting water should be given very sparingly, sufficient only to encourage root action. As soon as the bulbs are well rooted, water may be given more freely, the fibre mixture being then kept quite moist; if the mixture

NARCISSUS POETAZ ELVIRA
growing in Barr's Peat-Fibre Mixture.

is allowed at any time to become dry, even for a day, the flower buds will probably go blind; should by any chance too much water have been given the bowls may be drained by carefully tipping them on their side. If obtainable, rain water is the best to use.

When the bulbs have made some top growth the bowls should be removed to the sunny window of a sitting room, where they will get the morning sun, or be kept in a cool greenhouse close to the glass, as it is necessary that they should be given sufficient light and air to prevent the foliage from becoming drawn up. Draughts and gas heat must be carefully avoided.

No bottom heat should be given, and a temperature of 55° to 60° by day and 50° to 55° by night is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

Collections of Bulbs for Bowl Culture, page 12. Bowls and Peat-Fibre Mixture, page 98.

On Naturalising Bulbs and Plants in Grass, Woodlands, etc.

CROCUSES NATURALISED IN GRASS IN A LONDON PARK.

This fascinating phase of gardening deserves more attention than has hitherto been bestowed upon it. No sight is more delightful than the fresh brightness of spring flowers growing freely in grass land or lending colour to woodland walks, hedgerows, and ditches, here and there nestling at the foot of trees, or establishing themselves on sloping banks.

For naturalising in grass spring flowers are especially suitable, as they bloom and are over before the grass grows tall enough to hide their beauty. Amongst our spring-flowering bulbs there are many gems which refuse to grow in cultivated borders, but when planted in grass, where they enjoy a cooler and more even temperature, they soon become established, and multiply freely until a regular colony is formed which greatly adds to the charm of the landscape.

All formality of arrangement should be avoided, the bulbs being scattered freely from the hand and planted where they fall. Large irregular breaks of one kind of bulb should be made in order to obtain the finest effect. In planting under trees select spots where the soil is deepest and where the drip is least.

Those whose gardens are of limited size might make them very beautiful in spring, by utilising the fringes of their lawns and any grassy mounds or shady shrubbery walks for such spring favourites as Daffodils, Anemones, Scillas, Crocuses, Chionodoxas, etc., reserving the borders for summer- and autumn-herbaceous flowering plants. In large gardens and parks ample opportunities are afforded for naturalising spring-flowering bulbs, and very beautiful results may be attained in this way.

In planting bulbs *in grass*, **Barr's Bulb Planter** (see page 96) should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for covering the bulb. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting-place for the bulb, while by its use *the grass is not in the least disturbed*. Planting should not take place while the ground is hard, but after the first autumn rains. It is advisable to cut the grass as late in Autumn as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Spring-flowering bulbs in no way affect the hay crop, which may be cut at the usual season.

Among the many gems which lend themselves to wild gardening and naturalising, we would specially mention the following :—

Alliums (page 15), amongst these we would mention *Allium Moly*, with its bright yellow flowers, thriving anywhere; also the graceful little *Allium neopolitanum*, so useful for shady corners.

Anemones (see pages 17 to 19 and our Hardy Plant Catalogue), including the exquisite *Anemone Robinsiana* and the deeper blue and slightly taller *Anemone apennina* and *blanda*; one must see these lovely flowers nestling in grass or against the roots of large trees, to appreciate them fully.

Anthericum (see page 19), very graceful and decorative in grass.

Asphodelus ramosus (*King's Spear*, see Plant Catalogue), a fine plant for naturalising in grass.

Chionodoxas (pages 23 & 24) are amongst the most beautiful of early blue flowers, and should be largely used where the grass is kept short and not allowed to grow too coarse.

Crocuses. In grass the bright fresh colours of spring Crocuses contrast charmingly with their carpet of green. The beauty of *C. speciosus* (page 27) in September must strike every observer, while *C. Tommasinianus* (page 28) produces a lovely effect in February and March.

Cyclamen (see page 28), for naturalising under trees, on rockwork, etc.

Daffodils. For these favourite flowers, we refer readers to our **Daffodil Catalogue**.

Dog's Tooth Violets (*Erythronium dens-canis*, page 30) are lovely little subjects for shady places where the grass is not too rank.

Fritillaries (page 32). The purple and white Snakeshead Fritillaries (*F. meleagris*) are found growing wild in a few districts in England, and thus seen form a charming picture, full of grace and beauty. For shady corners they will be greatly appreciated, also when naturalised in grass.

Funkias (see our Hardy Plant Catalogue), we specially recommend these handsome plants for naturalising in woodlands, shady walks, or by waterside.

Helleborus (see our Hardy Plant Catalogue), for naturalising in shady places and in fern plantations.

Hemerocallis (see our Hardy Plant Catalogue), fine plants for shrubberies, wild gardens, or sunny situations by the waterside.

Irises, Tall and Dwarf Flag (see our Hardy Plant Catalogue), for naturalising in shrubberies, wild gardens, and the dwarfer varieties for sunny banks.

Muscari (page 64). *M. Heavenly Blue* may be termed the **QUEEN OF BLUE FLOWERS**; for a distant effect, massed on grassy banks or grouped for colour, it has no equal. *M. botryoides caeruleum* and its varieties, flowering earlier than *Heavenly Blue*, are also charming little subjects to naturalise.

Ornithogalum (page 68), flowering freely anywhere, and producing a very beautiful effect when dibbled in on banks and blended with Tulips, Muscari, etc.

Scillas, early-flowering (page 71), *sibirica* and *bifolia* varieties, are charming naturalised.

Tulips, these may often be naturalised on banks where, in the same locality, if planted on the level they die out. *Tulipa sylvestris major* and the dainty little *Tulipa persica* may be naturalised almost anywhere; the **May-flowering Cottage Tulips** (page 85) should be freely used for naturalising, especially *Picotee*, *Parisian Yellow*, *macrospila*, *Gesneriana*, *Bouton d'or*, etc. Plant at least 6 to 9 inches deep. All Tulips thrive best in partial shade and where sheltered from keen winds.

Wood Hyacinths (Late-flowering Scillas) (page 71) should be planted freely in shady walks; they soon make themselves at home and seed plentifully, with the result of much beautiful variation in form and character. Under pine and fir trees they may be naturalised with success.

Hardy Spring-flowering Alpine and Herbaceous Carpeting Plants

To associate with Spring-Flowering Bulbs in beds and borders or the wild garden.

For Spring decoration in association with bulbs the following plants will be found most useful. By their use as a groundwork or edging the most beautiful harmonies of colour may be obtained. Few sights in Spring are more beautiful than masses of the gold, white, and blue of the *Alyssum*, *Arabis*, and *Aubretia* associated with breadths of Daffodils, Scillas, Muscari, etc., or *Forget-me-Nots* (*Myosotis*) and *Golden Polyanthus* mingling with Daffodils or with gorgeous and stately Darwin Tulips. The *Acaena*, *Arenaria balearica*, *Mossy Saxifragas* and *Thymes* make beautiful carpets of foliage for the smaller and daintier spring bulbs flowers, such as *Narcissi*—*Cyclamineus*, *Minimus* and *Triandrus*, *Chionodoxas*, *Small Crocus Species*, etc.

ACÆNA (New Zealand Bur), producing dense close carpets of evergreen foliage, rapid growers. each—s. d

BUCHANANI, foliage beautiful soft pea-green, ht. 2 in. per doz. 5/- 0 6

F.—Barr's Choice 12/6 "Alpine Garden" Collection of Bulbs,

Containing rather more than half the quantity of Bulbs supplied in the above 21/- collection.

**For Collections of Bulbs for growing in Bowls and Vases
to flower during Winter and Early Spring, see page 12.**

A Few Fine Novelties and Specialities

In Bulbs and Tubers for 1915.

Those bulbs and tubers marked thus \times ripen late in the year and are sent out from November to March. All other bulbs, etc., are ready for despatch in September. Orders which embrace earlier and later ripening bulbs, etc., will be executed therefore in two parts.

		each—s. d
AMARYLLIS Belladonna Parkeri , a very handsome new hybrid of <i>Amaryllis Belladonna</i> crossed with <i>Brunsvigia Josephinæ</i> , producing a handsome umbel of 18 or more rose-coloured flowers, deepening with age and slightly tinged yellow towards centre ; it makes a handsome pot plant	7 6	
ANEMONE		
“ St. Brigid ,” an extra fine strain of these lovely Poppy Anemones, flowers very large, mostly semi-double, with finely divided petals, and of the most brilliant and varied shades of colour, all having a handsome blue-black central boss ; ht. 1 ft. (We send out only healthy young flowering roots giving the best results)	per 100, 10/6; per doz. 1/6	—
“ Cornflower ,” a very beautiful new variety with elegant fully double flowers of a dark amethyst-blue.....	per 100, 21/-; per doz. 3/-	0 4
Perle Angevine , a very beautiful <i>Chrysanthemum</i> -flowered Anemone with large pure white double and semi-double flowers, ht. 1 ft.....	per 100, 18/6; per doz. 2/8	0 3
St. Bavo , a beautiful new race of Anemones, originating from the large-flowered <i>Anemone fulgens alborohensis</i> ; the flowers, which are produced from early March to end of April, are large and graceful and range in colour from rose, salmon, and brick-red to dark carmine and sometimes white, ht. 1 ft.	per 100, 21/-; per doz. 3/-	—
CAMASSIA—Barr's Large-flowered Hybrids , a new giant race of the Quamash, throwing up stately spikes 3 to 4 ft. high, clothed with large star-shaped flowers ranging from white to pale and full blue and the richest purple ; exceedingly handsome hardy border plants	per doz. 3/6	0 4
CROCUS , Rare and Beautiful Species, autumn, winter, and spring-flowering, gems for the rock garden and pots. <i>Special descriptive list on application.</i>		
CROCUS Bleu Celeste , the most beautiful of all the large-flowered Crocuses, flowers soft pale azurc with silvery shading inside, and striking orange stigmata	per 1000, 70/-; per 100, 7/6; per doz. 1/3	—
Margot , a lovely variety, flowers large, outer petals shaded white, inner petals soft lavender, strongly recommended	per 1000, 50/-; per 100, 5/6; per doz. 1/6	—
FREESIA .—Beautiful New Varieties, strongly recommended as pot plants and to cut for vases. Their colours are bright and attractive and all are delightfully fragrant.		
Barr's White Beauty , a fine introduction, flowers large and of good form, white with bright yellow blotch, deliciously scented, very attractive	per doz. 5/6	0 6
Excelsior , producing strong erect spikes of flowers of great substance, cream-coloured with faint touches of orange on one side of the tube, very fragrant. AWARD OF MERIT, HAARLEM, 1915.....	per 100, 25/-; per doz. 3/6	0 4
Mauve Ideal , flowers very large, delicate silvery lavender, tube and centre white coloured chrome at base, centre golden-blotched, very beautiful	per doz. 25/-	2 3
Purity , a beautiful new variety, with long flowers of large size, pure white with faint lemon blotch on lower petal, tall vigorous grower	per 100, 10/6; per doz. 1/6	—
Robinetta , flowers large, rosy lake with white throat darkly veined and yellow centre ; the richest coloured of this type.....	per doz. 21/-	2 0
Barr's Beautiful New Hybrids , in a great variety of colours—rose, pink, ruby, salmon, coppery bronze, apricot, yellow, primrose, lavender, etc., per 100, 21/-; per doz. 3/-	0 4	

(For other beautiful Freesias see page 31.)

GALANTHUS nivalis , the Single Snowdrop,	each—s. d
gigantic bulbs, for producing a quantity of bloom, per 100, 7/6; per doz. 1/3	
GLADIOLUS "Europa," the largest and finest White Autumn Gladiolus (<i>Gandavensis</i>) yet raised and a grand acquisition	per doz. 2/- 2 0
HYACINTHS Many-Flowered , a great novelty, bulbs specially prepared for producing many good spikes of bloom from one bulb, from five to seven and more. We strongly recommend them for culture in pots and bowls as they are early flowering and remarkably decorative. Treatment same as for other Hyacinths. Colours—deep crimson, light porcelain-blue, rose-pink, and snow-white.....	each colour, per doz. 10/6 1 0
HYACINTH New Early "Rosy Dawn," a valuable new early-flowering variety, having the light graceful habit of the Roman Hyacinth, but with longer and larger spikes of a pretty light rose-pink; it can easily be had in bloom by January 1st...per 100, 42/-; per doz. 5/6	0 6
HYACINTHS Miniature Extra Early , specially prepared for early forcing, see page 43.	
IRIS Blue Giant , a grand new English Iris with flowers of remarkable size, the standards being 2½ in. long and 2 in. across, violet-purple marbled black, while the falls are 3½ in. long and 2½ in. broad, of a brilliant blue with velvety black spotting and marbling and a very conspicuous creamy white blotch with yellow streak; a noble plant, ht. 2½ ft. FIRST-CLASS CERTIFICATE, HAARLEM	per doz. 15/- 1 6
Cantab , a charming little early bulbous Iris, raised by Mr. E. A. Bowles; it is allied to <i>I. reticulata</i> and has pale blue standards and pale violet falls with a golden-orange crest. It has a good constitution and increases freely. A gem for pots and rockwork. AWARD OF MERIT R.H.S.	7 6
gracilipes , a rare and dainty Japanese alpine species forming cushions of soft green foliage, from which rise slender spikes of soft lilac-blue flowers with golden crest, ht. 4 in., per doz. 15/-	1 6
Royal Blue , a remarkably fine new Spanish Iris, standards rich blue-purple, falls of a fine dark azure-blue with striking golden-orange blotch, a large handsome flower, ht. 24 in.	per 100, 6/6; per doz. 1/- 0 2
Wilsoni , a fine new species collected by Mr. Wilson in China and closely allied to <i>I. sibirica</i> , standards primrose, falls primrose-yellow with deeper colouring at base and with handsome brown markings.	per doz. 7/6 0 8
For other beautiful English and Spanish Irises, New Giant Early Xiphium Irises, etc., see pages 45 to 51.	
LACHENALIA His Reverence , a very beautiful new variety bearing fine spikes of large bells shaded pale citron and soft green, forming a beautiful contrast to other Lachenalias, fine strong grower	per doz. 10/6 1 0
LEUCOJUM Gravetye Giant , a very handsome robust-growing variety of the Summer Snowflake (<i>L. aestivum</i>), producing in May bold heads of large open drooping bells, solid white tipped green ...	per doz. 7/6 0 8
LILIUM candidum (The Madonna Lily)	
Monster bulbs, per 100, 55/-; per doz. 7/6	0 8
LILIUM dauricum luteum (syn. Yellow Queen), a lovely new variety of the Siberian Lily <i>Lilium dauricum</i> , of vigorous growth with erect stems bearing a handsome umbel of upright cup-shaped flowers, of a clear yellow slightly shaded red towards centre, ht. 3½ ft.	
	per doz. 15/- 1 6
LILIUM regale (syn. <i>myriophyllum</i>), a rare and beautiful Chinese Lily having the appearance of a refined <i>Lilium Brownii</i> ; it bears in July on a sturdy leafy stem three to four trumpet-shaped flowers of great substance, expanded at mouth, colour inside waxy white, flushed yellow, back of petals broadly banded ruby-red, anthers golden, sweet-scented, ht. 3 ft. to 5 ft. Well established specimens attain a height of 7 ft. with 7 flowers on a stem ...	7/6 & 10 6

LEUCOJUM GRAVETYE GIANT.

each—s. d

X MONTBRETIA Star of the East (new 1912), the finest Montbretia yet raised and a great advance on all others. It produces bold spikes of very large erect flowers expanding quite flat, orange-gold with lemon eye, and orange-red on back of petals; remarkably handsome. FIRST-CLASS CERTIFICATE R.H.S., August 13, 1912 10 6

For other beautiful New Hybrid Montbretias, see page 63.

MORAEA iridioides Johnsoni, a beautiful cool greenhouse plant belonging to the Irideæ, producing elegant branched spikes of flowers, white with a pretty orange blotch and finely reticulated at base, the petaloid stigmas being of a pretty lavender shade. It remains decorative for a long period, ht. 3 ft. Nice Plants established in pots, 2/6 & 3 6

MUSCARI

"Heavenly Blue," the most beautiful of all Starch and Grape Hyacinths, and one of the loveliest blue flowers of spring,
monster bulbs giving an abundance of flower, per 1000, 90/-; per 100, 10/6; per doz. 1/6

Masseyanum, a rare distinct new Tassel-Hyacinth with bright rosy coloured flowers per doz. 21/- 2 0

SPARAXIS Scarlet Gem, flowers brilliant velvety scarlet with yellow centre, producing a gorgeous effect of colour when massed in borders or on rockwork; a gem for sunny situations outdoors or for pots, ht. ½ ft. per 100, 7/6; per doz. 1/3

TULIPS—May-flowering. A few beautiful and striking varieties.

Golden Bronze (4), a remarkably handsome and beautiful Cottage Tulip, flower large and cup-shaped of beautiful symmetry, colour glossy golden-bronze shaded mahogany towards centre, ht. 26 in.; quite an artist's flower per 100, 42/-; per doz. 5/6 0 6

Louis XIV. (4), a stately Cottage Tulip, bearing globular flowers of immense size, with broad petals rich purple heavily flushed golden-bronze at margin, inside golden-bronze shading to bronzy purple, very tall and stately; remarkably handsome, ht. 26 in. CERTIFICATE OF MERIT R.B.S. (Coloured Plate, 3d.) per doz. 25/- 2 3

Moonlight (1), a very beautiful Cottage Tulip with long elegant flowers of a delicate pale primrose; a most valuable Tulip for flower borders or cutting, ht. 20 in.
per 100, 35/-; per doz. 5/- 0 6

Mrs. Kerrell, a most lovely Cottage Tulip of elegant form with pointed petals, the three outer ones slightly reflexing, colour a beautiful light rose with delicate amber tinge, centre white bordered electric blue, ht. 18 in., very scarce. (Coloured Plate, 3d.) per doz. 21/- 2 0

Quaintness (4), a very distinct Cottage Tulip, large handsome long flowers, inside shaded mahogany on a dark golden ground, outside flushed deep rose. AWARD OF MERIT R.H.S. per doz. 21/- 2 0

Sensation, a remarkably handsome new Parrot Tulip and a great novelty, flowers very large, with deeply cut and curling petals, heavily blotched and striped blackish purple on a white ground, quite a new colour in Parrot Tulips. Botanical Certificate R.H.S., 1912 (only a few bulbs for sale) 7 6

Walter T. Ware, a grand Cottage Tulip, and the richest deep golden of all, flowers globular, with broad petals, the three outer ones reflexing at the top, very beautiful. A wonderful lasting Tulip, ht. 18 in. AWARD OF MERIT R.H.S. per doz. 25/- 2 3

TULIPS, Choice Species, all very beautiful. See page 92.

VELVETY GRASS PATHS.

A charming feature in well-laid-out Spring gardens are close velvety grass walks. They are soft to walk upon, restful to the eye, and provide a delightful contrast to the colours in the flower border.

BARR'S SPECIAL GRASS SEED FOR PATHS has been found a great success

per lb., 2/-; 10 lbs. for 18/-

Winter & Early Spring-Flowering Bulbs

FOR CULTURE IN VASES AND BOWLS

In Barr's New Peat-fibre Mixture

A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage holes, by simply using our specially prepared **Peat-fibre, Shell and Charcoal Mixture** (3s. 6d. per bushel, 1s. per peck, ready for use); the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases have no drainage holes); indeed, it is in every way preferable for growing bulbs in fancy bowls and vases for indoor decoration, being not only cleaner, but a warmer and better moisture-holding medium.

We recommend for culture in bowls or vases the following:—**Roman and Italian Hyacinths, Miniature and Large-flowered Hyacinths** (especially those specially prepared for early forcing), **Daffodils, Polyanthus and Poetaz Narcissi, Due Van Thol and May-flowering Tulips, Chionodoxas, Crocuses, Freesias, Fritillarias, Irises Alata, Reticulata, and Persica, Muscari Azureum, Early Scillas, Snowdrops, Jonquils, and Retarded Lilies of the Valley.** If bowls of Retarded Lilies of the Valley are planted fortnightly during Autumn, a succession of these beautiful flowers can be maintained from September to Christmas.

Full Cultural Directions on page 3.

Barr's 21/- Collection of Bulbs for Bowls and Vases

Containing a judicious selection of Bulbs for growing in the PEAT-FIBRE MIXTURE and which will give a succession of bloom from late Autumn to Spring.

DESCRIPTIVE LIST OF
The Best Bulbs, Tubers, etc.
FOR ALL SEASONS AND CLIMATES.

ALPHABETICALLY ARRANGED FOR EASY REFERENCE.

IN the following pages we give descriptions, as far as space permits, of the various Bulbs, etc., with general notes as to their cultural requirements. The illustrations are mostly reproductions, on a greatly reduced scale, of photographs taken at our Nurseries.

Great care is taken in the selecting of our Bulbs, these being drawn from the **best bulb farms only**. **High-class Daffodils** and **Tulips**, etc., also many rare and beautiful bulbous plants, *we are ourselves large growers of*.

Those bulbs and tubers marked thus **x** ripen late and are sent out from November to March. All other bulbs, etc., are ready for despatch in September and October. Orders which embrace early and late ripening bulbs, etc., will be executed therefore in two parts.

each—s. d

x ACHIMENES, a charming family of plants with brilliantly coloured elegant flowers making a very pleasing decoration in the greenhouse from early Summer onwards; in colour they range from vermillion and scarlet to rose, lavender-blue, and white, etc. Pot in rich light soil in batches from February to April (5 roots to a 5-inch pot) and plunge in a gentle bottom heat; when in bloom they may be removed to any ordinary greenhouse or conservatory.

5 each of 10 distinct varieties, 10/6 ; 5 each of 5 distinct varieties, 5/6

Beautiful Hybrids, mixed, containing a great variety of charming colours

per 100, 14/6 ; per doz. 2/- —

ACIDANTHERA bicolor. Plant in Spring, *see Spring Bulb Catalogue*.

ACONITE—Winter. *See Winter Aconite.*

ADONIS amurensis, producing graceful fern-like foliage and large single yellow flowers during February and March; plant from Sept. to Nov., ht. 1 ft.... 1 0

“ “ **fl. pl.**, producing handsome double yellow flowers during February and March, ht. 1 ft. 1 6

AGAPANTHUS (African Lily). Plant in Spring, *see Spring Bulb List*.

x ALBUCA Nelsoni, a lovely bulbous plant from the Cape, producing in July and August handsome spikes of almond-scented pure white flowers, with brown stripe down petal (under glass *pure white*), ht. 3 ft.; plant out of doors under a south wall in Spring, and lift the bulbs in Autumn; or pot up in late Autumn for greenhouse culture per doz. 12/6 1 3

ALLIUM, a decorative and showy family of hardy Spring- and Summer-flowering bulbs, valuable alike for borders or rockwork and for naturalising in woods, etc. They are Spring-flowering except where otherwise stated; plant Sept. to Nov.

acuminatum, with beautiful soft rosy lilac flowers in umbels, ht. 1 ft. per doz. 4/6 0 5

azureum, handsome intense blue flowers in July, very attractive, ht. 2 ft. „ 4/6 0 5

descendans, producing in July heads of dark red-purple flowers, ht. 2 ft. „ 5/6 0 6

flavum, small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering, ht. 3 ft. per doz. 3/6 0 4

karataviense, a handsome plant, with very large broad glaucous-green foliage spreading close to the ground, and large globular heads of reddish lilac flowers, ht. 1 1/2 ft. per doz. 3/6 0 4

Moly (Golden Garlic), showy bright yellow flowers in large handsome umbels, valuable for flower borders and naturalisation, ht. 1 ft. per 1000, 21/-; per 100, 2/3; per doz. 4d.

neapolitanum, an elegant bouquet flower largely grown for the market, producing numerous heads of graceful white flowers; it is also a charming plant to naturalise in shady woods, associated with the blue Wood Hyacinth, ht. 15 inches

Extra strong bulbs, per 100, 4/6 ; per doz. 8d. —

Ostrowskianum (*syn. oreophyllum*), a charming species from Asia Minor, with large heads of beautiful rose-coloured flowers, valuable for the rock garden and flower border, ht. 1 1/2 ft. per 100, 5/6 ; per doz. 10d. —

ALLIUM—continued.

		each—s. d
Rosenbachianum , producing large round heads of purple-rose flowers, a very showy variety, ht. 2½ ft.	per doz.	7/6 0 8
roseum , bearing umbels of bright rose-coloured flowers, ht. 1 ft. ... per 100, 10/6; „, 1 6 0 2		
triquetrum , white, striped green, pretty drooping umbels, ht. 1 ft. „, 12/6; „, 1/9 0 2		
zebdanense , producing umbels of pure white flowers on slender erect stems, in May, ht. 1½ ft.	per 100, 12/6; per doz.	1/9 0 2

Many other species of Alliums can also be supplied.

× **ALSTRÖMERIA**, these beautiful “**Peruvian Lilies**” are easy to cultivate, and produce in Summer abundance of showy attractive flowers, which last long in water when cut. They like a well-drained light soil and a sunny situation. *Aurantiaca*, *chilensis*, and *lutea* produce a most brilliant effect in the flower border. Plant from November to March with the top 6 inches below the surface, by preference close to a south wall or hedge, and protect, the first Winter, with leaves or litter. They should be allowed to remain undisturbed, so as to become well established. *Pelagrina* and *Pulchra* are more tender, and delight in hot dry sunny situations, such as under a south wall, and require protection in winter; they also make fine plants for a cool greenhouse.

aurantiaca (<i>syn. aurea</i>), handsome flowers ranging from rich to dark orange, spotted carmine, very showy and valuable for cutting; it should be grouped in every herbaceous border, ht. 3 ft.	per 100, 8/6; per doz.	1/3 0 2
chilensis hybrida, mixed , beautiful shades of rose, crimson, yellow, buff, and blush, with orange-yellow and crimson markings, ht. 2 ft.	per 100, 10/6; per doz.	1/6 0 2
lutea , bright yellow flowers spotted carmine, very pretty, ht. 3 ft. „, 10/6; „, 1/6 0 2		
pelagrina alba , white, very chaste and beautiful, ht. 1 ft. „, 12/6; „, 1/9 0 2		
„ rosea , rose, beautifully spotted, ht. 1 ft. „, 12/6; „, 1/9 0 2		
psittacina (<i>The Parrot Flower</i>), bright crimson, splashed green and mahogany, ht. 2 ft.	per 100, 12/6; per doz.	1/9 0 2
pulchra (<i>syn. tricolor</i>), white and yellow, blotched crimson, ht. 1 ft. „, 5/6 0 6		

× **AMARYLLIS (Hippeastrum), choice Greenhouse Varieties.** These are magnificent in the conservatory, and with management may be had in bloom for many months.

CULTURE.—Pot up the bulbs from December to March, and plunge the pots to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf-growth is produced, and a strong stem with a fine umbel of large flowers secured. In the absence of bottom heat they do well in an ordinary greenhouse or sunny sitting-room window if potted up in February.

Barr's Choice Unnamed Hybrids, extra strong flowering bulbs, purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beauty per doz. 30/-; each 2/9

ANEMONE ST. BRIGID. Semi-double Poppy Anemones.

ST. BRIGID ANEMONES.

A very lovely and distinct strain, of graceful habit and producing large flowers mostly semi-double with finely divided petals, of the most brilliant colours, all showing a handsome blue-black central boss, ht. 1 ft.; greatly prized for cutting. *We send out young flowering roots, as they give much finer flowers than older and larger roots.*

Barr's Splendid Mixed Seedlings, producing a great variety of brilliant and beautiful colours per 1000, 60/- 6 6...1 0

Extra Fine Strain 10 6...1 6

ANEMONE fulgens, The Scarlet Starry Windflower of the Pyrenees and Greece. This beautiful early Spring flower with its rich dazzling scarlet colour and light elegant growth should be used largely in wild gardens, orchards, woodlands, on banks, etc. If planted early in Autumn, flowers may be gathered, weather permitting, from Christmas; its hardiness is beyond all question, and the roots may be safely planted any month from August to February, in a position protected from ground winds and with a sunny or S.W. aspect. It likes a well-drained rich soil (not too damp). Never plant while the ground is wet.

ANEMONES, Various Beautiful Species for Autumn Planting.

ANEMONE BLANDA.

Where Daffodils are naturalised the following Anemones should be freely used: *Anemone apennina*, the blue Mountain Windflower, forms a dense cushion of rich blue and is one of the loveliest of dwarf Spring flowers. *A. blanda* resembles *A. apennina* in flower, but blooms a month earlier. The varieties of *Anemone nemorosa* (the true Wood Anemone), being shade-loving plants, should be under trees or in shady nooks on rockwork; naturalised in grass they present a picture full of grace and beauty. *A. palmaria* likes a damp spot during summer. For other beautiful Anemones, see our **Hardy Plant Catalogue**.

each—s. d.

	per 100, 15/-; per doz. 2/3
Ixioides splendens , a very handsome and beautiful variety bearing large umbels of light yellow flowers	0 3
laxa (<i>syn. Triteleia laxa</i>), bearing umbels of large rich Tyrian purple flowers, very handsome, ht. 1 ft.per 100, 5/6; per doz. 10d.	—
multiflora , producing in June an umbel of pretty waxy deep lilac flowers of star-like form, ht. 18 in.per doz. 4/6	0 5
Murrayana , producing branching umbels of large deep violet-blue flowers, very handsome; a free grower and a good bulb to naturalise, ht. 9 in.per doz. 5/6	0 6
peduncularis , a handsome species with umbels of china-white flowers on long pedicels	
	per 100, 6/6; per doz. 1/-
BULBOCODIUM vernum , producing early in Spring a mass of bright rose-purple flowers, valuable for edgings, rockwork, and naturalising in grass; plant September to November, ht. ½ ft.per 100, 12/6; per doz. 1/9	0 2

* **CALADIUMS**, perhaps the most beautiful and picturesque of foliage stove plants.

12 beautiful named varieties, 18/-, 24/-, 30/- & 42/-; 6 ditto, 9/-, 12/-, 15/- & 21/-

CALLA, or Arum Lily. See *Richardia*.

CALOCHORTUS, popularly known as the **Butterfly** or **Mariposa** **Tulips**, **Globe** **Tulips** and **Star** **Tulips**. These lovely Californian bulbs, although belonging to the same Natural Order as the **Tulips** of our gardens, bear little resemblance to them; they flower through June and July, and for delicacy of texture and brilliancy of colour are unsurpassed; they deserve a place in every hardy flower border and rock garden. The **Mariposa** or **Butterfly** **Tulips** are especially valuable for cutting, having long stems and being profuse continuous bloomers.

CULTURE OUTDOORS.—*The Calochorti are all quite hardy.* The "**Mariposa**" and "**Star Tulips**" require a sunny position and light gritty or sandy soil on slightly raised beds to ensure perfect drainage; plant from October to end of November, 2 to 3 inches deep, and 3 inches apart. Cover the beds after planting with straw or cut heather, to keep surface sweet and as a protection in case of early growth; remove the covering in March. A position facing south and sunny spots on the rockery are specially suitable. When in full growth give occasional soakings of water, but not too frequently. After flowering, ripen off by placing glass over them, and take up when foliage dies down. The "**Globe Tulips**," being woodland plants, like partial shade and a porous soil composed principally of leaf mould.

CULTURE IN POTS—*The Calochorti all make charming pot plants (three or four bulbs in a pot), and are easily grown in a cold greenhouse or cold frame with south aspect.*

BUTTERFLY TULIPS (CALOCHORTUS VENUSTUS VAR.)

C

CALOCHORTUS—continued.

As in the following List the numbers after the names indicate their relative order in time of flowering: thus those marked (1) are the earliest to bloom, and those marked (6) the latest. The heights we give are an average; under exceptionally good or poor conditions the plants may grow taller or dwarfer.

Calochortus, section 1.—Butterfly or Mariposa Tulips.

All of remarkable beauty, with large open flowers.

each—s. d

Catalinae (2), the earliest of all the Mariposa Tulips, bearing on tall slender stems very beautiful large flowers ranging from pale to deep lilac, with a dark maroon circle at base, ht. 16 to 24 in.....	per doz. 12/6	1	3
Clavatus , a grand species with very large expanded flowers about 4 inches across, of a brilliant golden-yellow, ht. 24 in. AWARD OF MERIT R.H.S.	per doz. 25/-	2	3
Gunnisoni (4), large pure white expanded flowers, with an inner hairy zone of green and gold, petals shaded outside green and azure, of great beauty, ht. 18 to 24 in., fine for cutting. AWARD OF MERIT R.H.S.	per doz. 12/6	1	3
Howelli , a beautiful species, bearing large straw-coloured flowers, ht. 12 to 15 in. , , , 17/6	17/6	1	8
Kennedyi , a most lovely species, flowers dazzling brick-scarlet with black central blotches, ht. 6 to 10 in. Plant in a warm sunny situation in a stony or gravelly soil Crop failed —			
macrocarpus (4), a splendid species, bearing very large flowers of a beautiful pale lavender, with dark centre banded green, ht. 12 to 18 in. AWARD OF MERIT R.H.S. per doz. 10/6	10/6	1	0
nitidus (4), bearing several large flowers, white flushed lilac, each petal covered with long silky hairs, with a bold indigo blotch in centre, beautiful, ht. 15 to 18 in..... per doz. 5/6	5/6	0	6
Plummeræ (4), bearing a branching spike of beautiful large soft lavender flowers, lined at base with long silky golden hairs, ht. 12 to 18 in. 1ST-CLASS CERT. R.H.S. per doz. 8/6	8/6	0	9
splendens (5), bearing on slender stems lovely satiny lilac-coloured flowers and covered with silky white hairs, ht. 24 to 30 in. per doz. 8/6	8/6	0	9
" ruber (4), bearing on tall slender stems large satiny flowers of a charming rosy lilac shade with purplish red centre, and covered with silky hairs, very beautiful, ht. 16 to 30 in. per doz. 8/6	8/6	0	9
Venustus group , all having flowers of exquisite beauty, large and elegantly formed, valuable for cutting; these are all robust growers.			
" citrinus (4), large flowers of a beautiful clear lemon-yellow, with conspicuous dark maroon blotch on middle of each petal, centre finely speckled maroon, and with a cushion of golden hair, of exquisite beauty; a gem for cutting, ht. 16 to 24 in. FIRST-CLASS CERTIFICATE.....per 100, 21/-; per doz. 3/-	3/-	0	4
" El Dorado (3), flowers varying in shade from white and cream to lilac, deep velvety purple and rosy purple, red, pink, and salmon, all having the centre exquisitely blotched and speckled soft brown and golden-yellow, while some have a beautiful golden blotch on each petal, of sturdy growth, ht. 1½ to 2 ft. AWARD OF MERIT R.H.S. per 100, 25/-; per doz. 3/6	3/6	0	4
" oculatus , a most beautiful variety, forming very long dark rose-coloured buds opening white with very dark blotch on petal, margined yellow, centre beautifully marked, exterior of flower rosy purple. AWARD OF MERIT R.H.S. per 100, 25/-; per doz. 3/6	3/6	0	4
" purpurascens (4), a lovely variety, flowers large, outside purplish, inside creamy white, each petal handsomely blotched, very free-flowering, ht. 12 to 24 in. AWARD OF MERIT R.H.S. per doz. 5/6	5/6	0	6
" roseus , an early-flowering form, flowers white, with carmine-rose on back of petals, inside having rosy red blotches and a rich maroon centre, beautiful, ht. 12 to 28 in. per doz. 4/6	4/6	0	5
" Vesta (4), a lovely variety and one of the freest growers; flowers large, and borne freely on long stalks, colour outside rose-purple, inside creamy white, with a broad halo of crimson-maroon and below this crimson-brown pencilling on a lemon ground, ht. 20 to 30 in. per doz. 5/6	5/6	0	6
mixed Butterfly or Mariposa Tulips. Everyone should grow these gems either in the open ground, on rockwork, or in potsper 100, 17/6; per doz. 2/6	17/6		

Calochortus, section 2.—Globe Tulips or Fairy Bells.

These are the perfection of grace, with beautiful globular drooping flowers; charming little subjects for half shady nooks on rockwork. They were formerly known as *Cyclobothras*.

albus (Fairy Lantern) (3), a species from the Sierras, bearing on branching stems several pearly white hairy flowers, which hang in pendent globes, ht. 12 in.....	per doz. 3/6	0	4
albus, The Pearl , a species from the Coast Range, bearing larger and handsomer flowers of a pearly white, tinged pink and brown, very globular, ht. 12 in.	per doz. 4/6	0	5
amabilis (2), bearing a quantity of golden globe-like pendent flowers, margins fringed with hair, dwarf and beautiful; of easy culture, ht. 8 to 10 in.	per doz. 3/6	0	4

CALOCHORTUS—GLOBE TULIPS—continued.

each—s. d

amoenus (Pink Globe Tulip) (2), a lovely new species, bearing lovely pendent globe-shaped flowers of a beautiful rose colour, ht. 6 to 8 in. FIRST-CLASS CERT. R.H.S.	per doz. 12/6	1	3
pulchellus, true , a lovely species, with large bright yellow flowers of fine form. AWARD OF MERIT R.H.S.	per doz. 12/6	1	3
mixed Globe Tulips or Fairy Bellsper 100, 15/-; , , 2/3			—

Calochortus, section 3.—Star Tulips.

These produce dainty open cups on slender dwarf stems, and are of exquisite beauty. On rockwork they are very charming.

Benthami (1), bright yellow with dark blotch at base, and covered with yellow hairs, ht. 4 to 6 in.	per 100, 17/6; per doz. 2/6	0	3
lilacinus (1), a beautiful dwarf species bearing numerous large pale lilac flowers, with or without a dark blotch, of easy culture, ht. 6 to 10 in.	per 100, 17/6; per doz. 2/6	0	3
Maweanus, var. roseus , having large open cup-shaped flowers, white flushed rose, densely covered with silky hairs, ht. 8 to 10 in.	per doz. 4/6	0	5
Maweanus, var. major (2), a very lovely species bearing large open cup-shaped white flowers covered with silky blue hairs, ht. 8 to 10 in.	per doz. 3/6	0	4
Purdyi (3), a very beautiful species of easy culture; it produces stems 10 to 15 inches high, well furnished with very large erect white flowers tinted mauve and green and covered inside with long hairs. FIRST-CLASS CERTIFICATE R.H.S.	per doz. 6/6	0	7
mixed Star Tulips , gems for the rock-gardenper 100, 17/6; , , 2/6			—

CAMASSIA (The Quamash), graceful hardy bulbous plants flowering from the end of May to June, charming in flower borders and valuable to naturalise.

Cusickii , a beautiful May-flowering variety, forming a rosette of broad glaucous foliage, from which rise tall elegant spikes of large pale lavender starry flowers with yellow anthers, ht. 3 ft.	per doz. 3/6	0	4
esculenta , producing spikes of pretty star-shaped blue flowers, ht. 1½ ft. ; charming when naturalised in grass	per 100, 4/6; per doz. 8d.		—
“ Blue Gem (new), bearing graceful slender spikes of large electric-blue flowers, ht. 2 ft.	per doz. 7/6	0	8
“ Blue Star , flowers large, of a pretty light blue, produced on graceful spikes, ht. 1½ ft.	per doz. 3/6	0	4
“ Mauve Queen (new), bearing on massive stems large star-shaped flowers of a beautiful mauve shade, ht. 3 ft.	per doz. 7/6	0	8
“ Royal Purple , a grand variety, producing large handsome spikes of large rich dark purple-blue flowers, ht. 1½ ft.	per doz. 3/6	0	4
“ Silver Queen , a new seedling, producing large soft silvery-blue flowers, evenly set on tall bold spikes 3 ft. in height, very handsome	per doz. 7/6	0	8
Fraseri , a pretty species from California, with delicate pale blue flowers, ht. 1 ft. , , 2/3	0	3	
Leichtlini , bearing elegant spikes of large starry flowers ranging from white to cream, and having handsome dark glaucous foliage, ht. 2 ft.	per doz. 5/6	0	6
“ atrose-cærulea , bearing grand spikes of handsome dark blue-purple flowers, a fine border plant, ht. 2½ to 3 ft.	per doz. 5/6	0	6

Seedling varieties in Mixture, a very pretty strain, containing many beautiful shades of blue, lavender, French white, etc., flowers large and handsome, very decorative when grouped in beds and borders, ht. 2 ft.per 100, 15/-; per doz. 2/3 o 3

CANNAS. See our Spring Catalogue of Bulbs and Tubers.

CHIONODOXA (Glory of the Snow). The *Chionodoxa* is one of our loveliest Spring flowers, and when established its sheets of blue in very early Spring are a great attraction in the garden. It should be largely used in borders and dotted over bulb beds, also massed on rockwork. Once planted it comes up year after year, the flower spikes increasing in size and beauty. When associated with *Narcissus minimus*, the effect is very charming. For an effect the first season, plant the bulbs close together. The *Chionodoxa* may be grown also in pots and vases and had in bloom early in January, if brought on in a cold frame or cool greenhouse close to the glass. *Plant September to November.*

Lucilæa (The Glory of the Snow), flowers brilliant blue, with clear snow-white centre.	fine home grown bulbs, per 1000, 50/-; per 100, 5/6; per doz. 10d.
“	extra fine home grown bulbs , , 60/-; , , 6/6; , , 1/-
“	extra large bulbs for pot-culture , , 8/6; , , 1/3
“ alba , white flowers of delicate beauty, rare ...	per doz. 3/6; each 4d.

CHIONODOXA—continued.

sardensis , flowers of a true Gentian-blue, and so striking that for distant effect it cannot be too highly recommended ...	<i>fine home grown bulbs</i> , per 1000, 40/-; per 100, 4/6; per doz. 8d.
“	<i>extra fine home grown bulbs</i> , , , 50/-; , , , 5/6; , , , 10d.
“	<i>extra large bulbs for pot-culture</i> , , , 6/6; , , , 1/-
gigantea (<i>syn. grandiflora</i>), very distinct and beautiful species, with large flowers of a beautiful soft lavender-blue, <i>fine home grown bulbs</i> , per 1000, 55/-; per 100, 6/-; per doz. 10d.	
“	<i>extra fine home grown bulbs</i> , , , 65/-; , , , 7/-; , , , 1/-
“	<i>very large bulbs, for pot-culture</i> , , , 10/6; , , , 1/6

“ **alba**, flowers white, very beautiful and rare each 1/6

Boissieri, a grand showy species blooming a shade dwarfer and later than *C. Luciliae*, flowers large, soft lavender-blue, with very large and striking snowy white centre per 100, 7/6; per doz. 1/3

Tmolusii, a valuable species for succession; it blooms later than *C. Luciliae*, the blue is more intense and the white centre larger per 100, 15/-; per doz. 2/3

× **CLIVIA** (*syn. Imantophyllum*), very handsome bulbous plants for conservatory and house decoration. They are easily grown in a temperature of 45 to 55 degrees with a moist atmosphere, but should be kept fairly dry while at rest. each.

New Named Varieties, bearing on stout stems bold umbels of large handsome flowers of various fine shades of orange and orange-scarlet 5/6, 7/6, 10/6 & 21 o

Unflowered Seedlings, from a fine strain of hybrids per doz. 48/- 4 6

COLCHICUM (Meadow Saffron); the great Crocus-like flowers carpet the ground in September and October, with colours ranging from pure white to intense crimson, more or less chequered or tessellated. In flower borders or naturalised in grass they are most beautiful. The foliage does not appear till Spring, and is very varied. If planted in August and early September most of the bulbs will bloom almost immediately. Colchicums should not be planted in grasslands used for grazing.

AUTUMN-FLOWERING VARIETIES.

Agrippinum , flowers chequered rose-purple and white, very pretty and showy	per 100, 15/-; per doz. 2/3 o 3
autumnale roseum , recommended instead of the type, being a much freer bloomer with larger and more flowers, colour a charming soft mauve shade, very effective. <i>Strong bulbs, giving several flowers</i> ... per 100, 21/-; per doz. 3/- o 4	
“ , , <i>Gigantic bulbs, giving a great mass of flowers</i> , , 30/-; , , 4/6 o 5

byzantinum , very beautiful rose-coloured flowers, perfect in form, and produced in great profusion per 100, 21/-; per doz. 3/- o 4	
cilicium , large handsome flowers, of a pretty soft rose chequered deeper rose and shaded crimson per 100, 21/-; per doz. 3/- o 4	
giganteum , a grand giant species from the <i>Zigana Dagh</i> (Gypsy Mountain), bearing immense expanded flowers of a beautiful soft rose shade with large white centre, remarkably handsome per doz. 5/6 o 6	
Sibthorpi , the finest of all Colchicums, flowers of immense size, delicate soft lilac, shaded and mottled white, and with conspicuous golden anthers 2 6	
speciosum , large handsome flowers varying in colour from light to bright rosy crimson, petals of great substance per 100, 30/-; per doz. 4/- o 5	
“ album , a grand variety with very large snowy white flowers of perfect form, remarkably handsome. FIRST-CLASS CERT. R.H.S. ... per doz. 15/- 1 6	
“ , , maximum , flowers very large and handsome, rich deep crimson, a grand variety per doz. 25/- 2 6	
mixed varieties , for naturalising in wild gardens, woodlands, etc., 100, 12/6; , , , 1/9 —	

Collection.—6 each of 10 named varieties, 26/-; 3 each, 13/6.

WINTER AND EARLY SPRING-FLOWERING MINIATURE COLCHICUMS.

Decaisnei, producing in profusion soft flesh-coloured flowers, Nov. to Jan. ... per doz. 6/6 o 7

libanoticum (*syn. montanum*), rose and white flowers in early Spring , , 6/6 o 7

× **COMMELINA tuberosa** (Blue Spiderwort). Plant in Spring; see our *Spring Catalogue of Bulbs and Tuber* per 100, 10/6; per doz. 1/6 o 2

each - s. d

COOPERIA Drummondii (Evening Star), a lovely little bulbous plant from Texas.	7/6	0	8
Pot up for greenhouse culture in Jan. or Feb., or plant out in Spring in a sunny sheltered situation and light soil; it produces long tubular waxy white flowers slightly tinged red outside, opening in the evening with a delicate primrose fragrance, ht. $\frac{3}{4}$ ft. per doz. 7/6 0 8			
CORYDALIS bulbosa , a very graceful little plant for front border and rockwork, producing in April rosy purple flowers, ht. $\frac{1}{2}$ ft. per 100, 7/6; per doz. 1/3 0 2			
CRINUM , handsome bulbous plants, with large umbels of funnel-shaped flowers. <i>C. Moorei</i> , <i>C. Powellii</i> , and <i>C. longifolium</i> varieties are hardy in England if planted on warm sunny borders with their tops just showing a few inches above the ground, which should be covered during winter with light litter. <i>C. longifolium</i> is best planted in Spring; it is a fine plant for the water's edge or herbaceous border: give plenty of water while in growth. All Crinums require to be established before flowering freely. Previously to planting the soil should in all cases be deeply dug.			
longifolium (syn. <i>capense</i>). See SPRING BULB LIST per doz. 7/6 0 8			
" album . See SPRING BULB LIST , 7/6 0 8			
Moorei (syn. <i>Makoyanum</i>), bearing fine large blush-rose flowers, a fine handsome variety, ht. 2 ft. 2 6			
" album , bearing very beautiful large pure white sweet-scented flowers, very handsome, ht. 2 ft. 3 6			
Powellii , a very handsome species with large rose-coloured flowers, ht. 3 to 4 ft., per doz. 8/6 0 9			
" album , bearing very beautiful large pure white flowers, ht. 3 to 4 ft. , 10/6 1 0			
☞ The species <i>campanulatum</i> , <i>erubescens</i> , <i>fimbriatum</i> , <i>Rattrayi</i> , and <i>Yemense</i> can also be supplied - for prices see SPRING BULB CATALOGUE.			
CROCOSMA .			
aurea , lighting up the garden in September with its graceful racemes of brilliant reddish orange flowers, which are greatly prized for cutting, ht. 3 ft. The best treatment is to pot up the corms (6 in a 6-inch pot) in November or December, keep them in a cold frame until April, and then plant out in a peaty soil (not too dry) with warm sunny aspect. They may then be left to establish themselves, but during winter a light covering of dried heather or such like material should be given. Grown on as a pot plant the <i>Crocrosma</i> affords a brilliant decoration indoors in autumn per doz. 4/6 0 5			

CROCUS IN BOWL.

BARR'S CHEAP SHOWY CROCUSES for Large Plantings.

For a gorgeous effect in early Spring nothing can equal large masses of Golden-Yellow or Purple and Blue Crocuses, which attract the eye at a great distance. The value of the larger sized bulbs of Yellow Crocuses is that they produce more flowers.

CROCUSES.

The Crocus is one of the earliest flowers of Spring, and occupies a deservedly prominent place in every garden. Planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or pure white Crocuses when they expand their blossoms, in February and March. In lawns and pleasure parks, planted in the grass, Crocuses are extremely effective. In wild gardens, woodland walks, etc., the Crocus should be associated with the violet, the primrose, and the oxlip. The larger size bulbs are beautiful in bowls and vases for indoor decoration.

For outdoors plant as shallow as possible, barely covering the bulb; many amateurs plant too deeply, which is often the cause of Crocuses failing to bloom. Early plantings give the best results.

BARR'S LARGE-FLOWERED CROCUSES.

For Pots, Bowl-Culture and Select Flower Beds.

The following large-flowered named Crocuses are the best in cultivation, and we can confidently recommend them for planting in groups, edgings, select beds, and in designs. The golden-yellow Crocuses flower a little in advance of the others. *To obtain the finest effect the bulbs should be planted an inch apart.* When grown in pots, plant thickly, and plunge the pots in peat fibre up to the rims only. When removed from under the fibre, place in an airy situation, and give water very freely at the roots. A charming effect is obtained by growing Crocuses in shallow saucers, using Barr's Peat-fibre, Shell and Charcoal Mixture, or Pebbles and water (the bulbs touching one another). The saucers should be kept in an airy room without a fire, where gas is seldom burnt and where they can get plenty of light. When the bulbs are coming into bloom they may be placed in a sunny window in the sitting-room. Any attempt to force Crocuses will cause them to go blind.

CROCUSES.

BARR'S AUTUMN-, WINTER- AND SPRING-FLOWER SPECIES.

No hardy garden is complete without these little floral gems, which carry on a continual display of bloom from August to March, and light up the garden with their bright colours in winter when few other plants are flowering. They are all very dainty and refined and on rockwork and in grass form a charming picture, while in pots they make a very pretty effect. The delightful effect produced by masses of **C. speciosus**, **C. longiflorus**, **C. sativus**, **C. Tommasinianus**, etc., when naturalised, can only be realised by those who have witnessed it. In nomenclature we have followed Mr. GEORGE MAW'S MONOGRAPH ON THE CROCUS.

CULTURAL DIRECTIONS.—Any ordinary garden soil suits these Crocuses. Plant very shallow, barely covering the corms with soil; the Autumn-flowering varieties plant in July or August, the Winter and Spring-flowering varieties in September or October.

CROWN IMPERIAL. See *Fritillaria imperialis*, page 33.

CYCLAMEN Persicum, for Greenhouse, Large-Flowered Strain, a great improvement on the old strain; plants are of fine compact habit, with flowers large, of rich and delicate colours, and standing well above the handsome foliage.

Plants in Pots set with bud or in bloom, supplied from September to December—per doz. 15/-, 21/-, and 25/-; each 1/6, 2/6, and 2/6, according to size.

Seed saved from Finest Colours, for November Sowingper pkt. 2/6 and 3/6

HARDY CYCLAMEN.

Autumn-, Winter- and Spring-Flowering.

HARDY CYCLAMEN NATURALISED AT FOOT OF A TREE.

These Hardy Cyclamen require perfect drainage, and shelter from ground winds and the early morning sun; at the bottom of old walls facing north and on rockwork they are very beautiful, or nestling in the grass, near the roots and under the shelter of old trees, they produce a most charming effect; they are also good subjects for fern plantations, where they obtain the shade they like. In making up a soil for the hardy Cyclamen, add a liberal proportion of old mortar rubble with some well-decayed leaf soil and good fibrous loam. These Cyclamen prefer shallow planting with the exception only of *europaeum*, which should be planted 4 to 6 inches deep; they should all have a mulching of well-decayed leaf soil after planting.

EREMURUS (Fox Tail Lily), a noble family of hardy plants which we can strongly recommend for grouping in large flower and shrubbery borders, where their stately flower spikes are seen to advantage. The flowering season extends from May to July. They delight in a situation protected from the morning sun and sheltered from high winds, and should be given a good loamy soil. In the case of the earlier flowering species it is well to protect the crowns when first appearing with a little light material such as dry heather. Plant from September to December.			
Bungei , flowers in July, yellow with orange-coloured anthers, covering one-third of the stems; a handsome border plant, ht. 5 to 6 ft.	Roots according to size, 3/6 &	5	6
himalaicus , a most lovely species from the Himalayas, producing from May to June stately spikes 6 to 8 ft. high, clothed for nearly 2 ft. with large snowy white flowers having golden anthers	2/6 &	3	6

ERYTHRONIUM (Dog's-Tooth Violets). In Spring there is no prettier sight than a mass or edging of Dog's-Tooth Violets, with their prettily variegated foliage and graceful Cyclamen-like flowers. Naturalised in grass they present a charming picture.

Δ indicates the large handsome American varieties strongly recommended for choice positions in the rock-garden or for pot-culture; they all prefer a partially shaded and moist but well-drained situation. Plant the roots about 6 to 12 inches deep (the lighter the soil the deeper) and surround with sand. These American Erythroniums will be sent out early in October, and should be planted at once. The other Erythroniums can be supplied in September.

EUCHARIS amazonica (The White Amazon Lily), the snow-white flowers of this handsome stove-plant are deliciously fragrant, and are much used for bouquets and wreaths, ht. 1 $\frac{1}{2}$ ft. *Strong bulbs*, per doz. 25/- each s. d 2 3

xEUCOMIS punctata. See our *Spring Catalogue of Bulbs and Tubers*..... „ 12/6 1 3

FREESIA (Sweet-scented). Freesias are prized for their delightfully fragrant graceful flowers, which last longer in water than almost any other flower. Pot up the corms from August to October, 6 in a 5-inch pot, or 12 in a 7-inch to make a better display. The tops of the bulbs should be buried 2 inches below the surface of the soil, which should be a compost of good mellow loam, well-decayed farmyard manure and a little bonemeal. Care must be taken that there is good drainage. Stand the pots outside on a sunny border and keep them slightly shaded until growth is showing, when expose them to full sun and keep them in continuous growth, giving water when dry. Before severe frost comes on, remove the pots to the sunny part of a greenhouse and give plenty of air (avoiding draught). Or they may be placed in an airy sunny window, care being taken not to expose them to draught or the drying heat arising from gas. As growth progresses give more water, and when flower spikes are showing supply moisture by standing the pots in saucers of water. When the flower buds are opening, a little weak liquid manure water will be found beneficial. If required for Christmas decoration the corms should be potted up in August, grown out of doors as described above, and be brought into a gentle warmth from the end of November to the beginning of December. By bringing into warmth successive batches during November, December and January a succession of bloom can be easily maintained. **The coloured Freesias offered are wonderfully decorative.**

FREESIA PURITY.

a little weak liquid manure water will be found beneficial. If required for Christmas decoration the corms should be potted up in August, grown out of doors as described above, and be brought into a gentle warmth from the end of November to the beginning of December. FRITILLARIA imperialis (Crown Imperial).

FRITILLARIA IMPERIALIS (CROWN IMPERIAL).

The Crown Imperial is a stately hardy border-plant, very effective in Spring when grouped in woodlands, wild gardens, orchards, etc. Its tall, stout, leafy stem terminates in a cluster of large drooping bell-shaped flowers, surmounted by a whorl of fresh green leaves. For forming bold groups in the permanent border or on lawns it is of great value, and should be allowed to remain undisturbed. To obtain the best results, *plant the bulbs in September*, in a good deep loam, the top 4 to 5 inches below the surface, and by preference on their sides, to prevent moisture accumulating in the centre. *We offer specially strong selected bulbs, superior to what are usually sold*, and which we hope will all bloom the first season. The Crown Imperial, however, is a plant which requires to become established a year in the ground to be at its best.

GALANTHUS (Snowdrop).

GALANTHUS ELWESII IN GRASS.

In the early Spring months there is nothing more beautiful than a sheet of the snowy graceful blossoms of the SNOWDROP. In planting, the bulbs should almost touch each other. An effect of surpassing beauty may be obtained by associating SNOWDROPS with SCILLAS SIBERICA and BIFOLIA, CHIONODOXAS, WINTER ACONITES, etc. Where possible such plantings should be permanent, and the surface of the soil top-dressed in Summer and sown with annuals, such as Nemophila, Leptosiphon, etc., or planted with surface-rooting bedding plants.

The SNOWDROP looks charming when nestling in grass, on hedge banks, etc. The turf need not be disturbed if Barr's *Bulb Planter* be used (see page 96); this cuts out clean holes large enough to take two or three bulbs.

Permanent plantings of Snowdrops should be made as far as possible in shady situations.

On light soils Snowdrops should be planted **6 to 9 inches deep**, the larger bulbs being planted the deepest. Plant September to November.

GALANTHUS—continued.

GALANTHUS Elwesii, Elwes' Giant Single Snowdrop, a distinct and beautiful species from Asia Minor and one of the most handsome of all Snowdrops. It has very large snowy globular flowers, the inner segments being marked rich emerald-green and white. By gentle forcing in pots or bowls it may be had in bloom during winter. The bulbs for naturalising should be planted where possible on stony slopes, in unmanured soil. We usually have collected bulbs of this Snowdrop from Asia Minor, but the war, of course, has now prevented this. Fortunately, we planted at our Taplow Nurseries last autumn a fair quantity, and these are the bulbs now offered.

Good Selected Homegrown Bulbs ...per 1000, 50/-; per 100, 5/6; per doz. 10d.

× GLADIOLUS.

BARR'S SUMMER-FLOWERING VARIETIES.

For Autumn and Winter Planting.

These beautiful Early-flowering Gladioli should be largely planted for supplying cut bloom from May to July; and for the fine effect they produce in the flower garden. **G. Colvillei The Bride** is extensively grown in pots and boxes for cutting during April, May, and June. All may be grown in pots for indoor decoration.

CULTURE OUTDOORS.—Select a situation protected from cutting winds and shaded from the mid-day sun. Deeply dig the ground, working in plenty of rotten manure in the underspit, and see that the soil is made light and friable. Plant the bulbs from October to November by preference, although they may be put in as late as January. They should be put in at a depth of five to six inches, and in the case of the later plantings the bulbs should be soaked in water a few hours previously. Before severe frost comes on cover with a little long straw litter or other light material, which remove in March. In May mulch the plants and keep them well watered. If the Summer is dry and the weather hot, give an occasional good soaking of water or weak liquid manure. A mulching of well-decayed manure in early summer will considerably benefit the plants.

GLADIOLUS, SUMMER-FLOWERING—continued.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five bulbs, according to size, in a 5- or 6-inch pot, and plunge in ashes up to the rim of the pot in a cold frame or pit, withholding water till the bulbs have started into growth; or, the pots may be buried up to the rim in ashes out of doors under a south wall, a light covering of such material as dried heather being given as a protection against severe frost. When the plants are well advanced in growth they may be removed to the greenhouse, and should be carefully attended to with water.

x EARLY SUMMER-FLOWERING HARDY GLADIOLI.

These commence to bloom out of doors the beginning of June or by gentle forcing may be had in flower in April and May.

x GLADIOLUS GANDAVENSIS.

Large-flowered Autumn Gladiolus.

In spite of all the various new hybrid Gladioli recently raised, the *Gladiolus Gandavensis* still holds its own, its long handsome spikes of bloom and fine erect habit of growth rendering it a valuable decorative plant for the flower and herbaceous border. A descriptive list, with cultural directions, will be found in our SPRING CATALOGUE OF BULBS AND TUBERS published February 1st, which may be had on application.

Plant the corms out of doors from March to May, or pot up in February and March.

x GLADIOLUS BRENCHLEYENSIS.
The Large-flowered Vermilion-Scarlet Gladiolus.

This well-known handsome Gladiolus blooms just before the *Gladiolus Gandavensis* varieties, and is one of the most valuable for bedding. By successional plantings outdoors from end of March to May, a brilliant display of bloom may be had from middle of July to late autumn. A fine effect may be produced by massing this Gladiolus with *Galtonia candicans*, the snowy white spikes of which top the Scarlet Gladioli; both bloom about the same time.

× GLADIOLUS, NEW HYBRID BUTTERFLY.**(Gladiolus Lemoinei.)**

These beautiful Gladioli should have a place in every flower border; the flowers are of the most delicate and brilliant shades, and are all handsomely blotched with fine contrasting colours. They are hardy vigorous growers. A descriptive list will be found in our *Spring Catalogue of Bulbs and Tubers*.

Plant the corms outdoors from March to April, or pot up in February and March.

VARIOUS BEAUTIFUL GLADIOLI.

Plant the corms from March to April. each—s. d

× Childsii, Mixed Hybrids, a fine robust race of Gladioli, resulting from a cross between *G. Nanceianus* varieties and *Lemoine's Butterfly Gladioli*, and blooming about the same time. The flowers are very large, and produced on long sturdy spikes, and range in colour from roses and pinks to reds and fiery scarlets; valuable for grouping in herbaceous borders, ht. 3 to 5 ft.per 100, 10/6; per doz. 1/6

× primulinus (Maid of the Mist), a rare and lovely species found growing in the neighbourhood of the Victoria Falls on the Zambesi River, where the spray at times completely covers it. The flowers, which are of a beautiful soft primrose-yellow, are of quaint hooded form and borne on spikes 2 to 3 ft. high, from July to August. Easily grown in pots in a cold greenhouse or out of doors in warm localities; while in full growth the plants should be given a liberal supply of waterper 100, 25/-; per doz. 3/6 0 4

× primulinus hybrids, a most lovely new strain of Gladioli of the same light graceful habit as *G. primulinus*, but colours ranging from yellow to salmon, rosy buff, apricot, pale copper and other delicate art shades, ht. 2½ ft.per 100, 30/-; per doz. 4/3 0 5

GLADIOLI, AUTUMN-FLOWERING—continued.

each—s. d

× Principis , a magnificent showy Gladiolus of tall robust habit, bearing long handsome spikes of immense open flowers of a brilliant glowing scarlet, with snowy white stripe down centre of petal, and towards the centre a large cream-coloured blotch stippled crimson; remarkably effective in the flower border	per 100, 10/6	per doz. 1/6	0	2
× GLORIOSA (Glory Lilies), very beautiful bulbous warm greenhouse or stove climbers with brilliantly coloured flowers. Trained on globes or wires the blooms are seen to advantage. The roots should be grown in a compost of loam and peat.				
Leopoldi , a fine new Glory Lily from the Congo, producing an abundance of beautiful self-golden-yellow flowers; a grand warm greenhouse climber			4	6
Rothschildiana , the true original species from Uganda and the finest of all, with flowers measuring nearly 6 inches across, colour crimson-lake, the perianth segments being margined gold, anthers golden.....			3	6
superba (The Malabar Glory Lily), bearing brilliant rich orange-red flowers; remarkably showy			2	6

GLORY OF THE SNOW. See *Chionodoxa*, page 23.× **GLOXINIA**, beautiful bulbous stove plants, large flowers of perfect form, colours rich and varied.

BARR'S CHOICE NAMED HYACINTHS.

For Glasses, Jardinets, Bowls, Pots, and for Exhibition.

HYACINTH LA BELLE GROWING IN BOWL.

Culture in Pots.—The soil should be a compost of good fibrous loam with a liberal addition of leaf-soil, sharp sand, and thoroughly well-decayed cow manure. *PHYTOBROMA* (see page 96) may also be added at the rate of 1 lb. per bushel. The compost should be well mixed and left to stand some time before being used. *New pots should be well soaked in water before use.*

In potting, barely cover the bulb, and let the soil be $\frac{3}{4}$ in. below the rim of the pot, to allow for watering. After potting give one good watering and then place the pots outdoors on a bed of house ashes, cover with three to four inches of peat-fibre and leave them exposed to all weathers. *When the bulbs have well rooted*, and made about an inch of top growth, they may be removed indoors, first into a subdued light, until the blanched foliage has attained its full green colour, and then into the sunniest situation at command in the greenhouse or conservatory. It is a good plan to place an inverted flower pot over the young growths for a few days after being removed from the plunging bed, as by so doing they are protected from possible draught. Abundance of air, a moderately moist atmosphere, and plenty of water at the roots are then necessary for early well-developed flower-spikes. *A dry or frosty atmosphere or a draughty situation will cause the flower-buds to shrivel.* *Forcing should only be done gently*, the temperature not exceeding 60 degrees. A too frequent fault made in forcing Hyacinths is that they are subjected to heat before the bulbs are fully rooted.

For earliest flowers namely, for January and February—pot middle of September and leave in the plunging bed 10 to 12 weeks.

If finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth should not be forced; pot up the bulbs in October and leave them plunged out of doors three months or more, according to season, then remove them to a mild temperature like that of a cool greenhouse, a sitting-room window, or frame, always selecting the sunniest and most genial situation.

Culture in Glasses.—*We recommend only Single Hyacinths for glasses.* The most reliable sorts for growing in glasses we have indicated by Ψ . Pure clean water (rain-water by preference) the same temperature as the room should be used, with a piece or two of pure wood charcoal in it. The bulb can be made secure in the glass by a piece of fish netting, and its base should at all times just touch the water. Place the glasses in a cool dark place to encourage root growth, and keep supplied with water as required. When nearly full of roots (not before), and an inch or two of top growth has been made, admit them to the light gradually, and then to the sunniest place at command where there is full light and an even airy temperature. *Avoid a too dry or frosty atmosphere or a draughty situation*, as such conditions will often cause the flower-buds to shrivel up. A little rain-water gently sprinkled daily on the green flower-spikes will assist in their development. **Barr's Peat-Fibre Mixture** is an excellent material for growing Hyacinths in, and is clean and inoffensive to handle (see page 3 for directions).

Culture in Jardinets.—For this purpose *Barr's Peat-fibre, Shell and Charcoal Mixture* is undoubtedly the best material to use. It should be always kept moist, and when the jardinets are removed to the sitting-room the surface should be covered with fresh green carpet moss or mossy Saxifrage. Grown in jardinets, Hyacinths are charming when associated with early Spring-flowering bulbs like **Chionodoxas**, **Scilla sibirica**, **Snowdrops**, **Tulips**, **Crocuses**, **Narcissi**, **Iris reticulata**, etc.

Hanging Moss Balls of Hyacinths.—Very charming hanging baskets of Hyacinths can be made with balls of fresh Sphagnum moss, 9 inches in diameter. First make up a ball of moss about 8 inches in diameter, into which insert the Hyacinth bulbs all round, binding them in with tarred string and more moss so that only their points are visible. Then run a wire through by which the ball can be suspended in greenhouse or sitting-room window. No more attention will be required except to dip the ball in water about once a fortnight. Such hanging baskets can be effectively made with Named or Bedding Hyacinths, and also with Roman Hyacinths. The open wirework baskets which are sold can be filled in the same way.

Extra Early Miniature Hyacinths, specially prepared for very early forcing.—These Hyacinths are harvested specially early and so prepared as to be capable of being quite easily forced into bloom by January, and are therefore of the greatest value for producing a bright and effective decoration during the period between the flowering of the Roman and Italian Hyacinths and the ordinary Dutch pot Hyacinths. The bulbs should be potted up by the middle of September, plunged in a cold airy frame, and removed indoors to a gentle heat about the middle of November. *See page 43.*

BARR'S "PRIZE-WINNING" EXHIBITION HYACINTHS.

A very careful selection of a few of the finest Hyacinths for Exhibitors.

We have selected these varieties out of many hundreds, as being specially suitable for exhibition on account of their grand spikes of fine form, their large bells and beautiful colours. Several of them are new varieties, and a great advancement on existing kinds. **Most of them have been awarded prizes and certificates of merit.** All are single-flowered varieties except where otherwise stated.

BARR'S EXTRA SELECTED BEDDING HYACINTHS.

For Bedding, Boxes, Bowls, or Pot-Culture.

The following Hyacinths we have specially selected after many careful trials at our Nurseries as being the **very best for bedding together or alone**. They all have good-sized, well-formed spikes of distinct pure colours and are superior to ordinary bedding Hyacinths. Besides for bedding, we can strongly recommend them for filling flower boxes, rustic baskets and vases, etc. The numerals after the names indicate the relative time of flowering, those marked (1) opening first, and those marked (3) last. Those marked (1) and (2) may be safely bedded together, as also those marked (2) and (3), the difference in development only being a few days.

Barr's Special Mixture of beautiful colours, per 100, 10/6; per doz. 1/6**BARR'S EXTRA EARLY MINIATURE HYACINTHS.****For Very Early Forcing.**

These Hyacinths are harvested specially early and so prepared as to be capable of being quite easily forced into bloom by January, and are therefore of the greatest value for producing a bright and effective decoration during the period between the flowering of the Roman and Italian Hyacinths and the ordinary Dutch pot Hyacinths. The bulbs should be potted up by the middle of September, plunged in a cold airy frame, and removed indoors to a gentle heat about the middle of November.

EARLY WHITE ROMAN HYACINTH.**Extra Selected French-grown Bulbs.**

This charming little Hyacinth is of great value for early forcing, and may be had in bloom during November, December, and January by successional plantings. Several bulbs in a pot make a charming Winter decoration for the greenhouse or sitting-room, while to cut for bouquets and vases the graceful spikes of sweet-scented blooms are highly prized. The Roman and Italian Hyacinths lend themselves readily to culture in bowls of our **Peat-fibre, Shell and Charcoal Mixture**. (*For Cultural Directions, see page 3.*)

Early White Roman Hyacinth, per doz.**First-size Selected Bulbs** per 100, 18/6 2 8**Extra Large Selected Bulbs** ,, 25/- 3 6**A few Monster Bulbs**, producing

a large number of flower spikes ,, 30/- 4 0

Smaller bulbs we do not stock, as they produce fewer flower spikes than the above; we can procure them for customers, however, if required.

BARR'S EARLY WHITE ROMAN HYACINTHS GROWN IN A BOWL.

EARLY ITALIAN AND FRENCH HYACINTHS.

These bloom just after the White Roman Hyacinth, and are therefore valuable for succession. They are all of graceful beauty, and may be had in bloom in December and January. They can easily be grown in bowls of **pebbles and water** or our prepared **Peat-fibre, shell, and charcoal mixture**, and make a very pretty decoration for the greenhouse and sitting-room.

IRISES.

These may be called the "Orchids" of the flower garden, their blossoms competing in richness and variety of colour with the choicest and the most beautiful Orchids. They should be extensively planted in flower and shrubbery borders, and naturalised ; a judicious selection will give a display of bloom from Christmas to August. See our *Hardy Plant Catalogue* for all kinds of Flag Irises.

BARR'S GRAND ENGLISH IRISES.

June to July-flowering.

These magnificent English Irises (*I. xiphioides*) thrive in any ordinary garden soil. The earlier the planting, after beginning of September, the greater the success, although the bulbs may be put in as late as December. The varieties contained in our collection we have specially selected as being the finest and most distinct, and they will be found as strikingly beautiful in colour as many of the sumptuous Orchids of the hothouse. They flower from end of June to beginning of July, thus succeeding the Bearded Flag Irises and Spanish Irises. As cut flowers they take a first place.

BARR'S BEAUTIFUL SPANISH IRISES.

June-flowering.

These Spanish Irises (*Iris Xiphium*) flower a fortnight before the English, and differ from them considerably in colour and form. The curious and charming blendings of shades in the same flower give them the appearance of many of our rare orchids, with which they can well compete in grace and beauty. For vases and bouquets the cut flowers are greatly prized, as they last long when cut, and the buds open well in water. For flower-beds and massing in borders they are of the greatest value. **The varieties forming our collection are the finest and most distinct in cultivation.** They are easily grown in any good light soil either in an open or partially shaded situation. They will also bear very gentle forcing in pots, but this should not be attempted until the flower buds are developing.

IRIS—New Giant Early Xiphium.

This new race of Irises was raised by Mr. C. G. Van Tubergen, by crossing *Iris tingitana*, *Iris Boissieri*, and other *Niphium* Irises, and during the last ten years they have been carefully selected and improved upon. They differ from the Spanish Irises in flowering a fortnight earlier (commencing to bloom about end of May), and having larger flowers of greater substance, while the foliage is very broad and glaucous. They will be found valuable in giving a decoration in the garden in the period intervening between the late Cottage Tulips and the Spanish Irises. Their colours are bright and attractive. In very cold districts they should be given slight protection from frost during winter.

IRIS—VARIOUS BEAUTIFUL BULBOUS, TUBEROUS-ROOTED, ETC.

THESE IRIS SPECIES are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species will be more enjoyed if planted on rockwork, where the flowers have a little protection from heavy rains. *Alata*, *Reticulata* var. *Histrionis* and *Histrionides*, and *Vartani* are charming Winter-flowering species, followed in February by *I. reticulata*, with its lovely violet-scented blossoms, the sweet-scented *I. persica*, *Danfordiae*, and the beautiful species *I. Sindjarensis*. Next in succession come the interesting *Bucharica*, *Caucasica*, *Orchoides*, *Warleyensis*, the curious Snakeshead Iris *tuberosa*, and the species *I. Sindjarensis*. The pretty Peacock Iris (*I. pavonia*) and *Iris fluvialis* *Bloudovi* flower in May, and are followed in June by *Iris juncea*, *Boissieri*, *Lusitanica*, and *tingitana*.

The Irises marked † belong to the *Juno* section, and thrive best planted in rich light or sandy soil with a light dressing of old manure. As they are mostly winter and early spring-flowering species give them a position protected from the early morning sun.

GS. S. is used to signify Standards, or the erect petals; F. Falls, or the drooping petals. each—s. d

IRIS ALATA.

Cretensis, a charming little winter-flowering Iris from Greece, resembling *I. unguicularis*, but much dwarfer; flowers delicate blue, ht. 6 in.; good for sunny rock-gardens per doz. 7/6 o 9

Cristata, flowers rich amethyst-blue, striped orange, a real gem for massing in the rock-garden, in damp or half-shaded situations, ht. $\frac{1}{4}$ ft., *May-flowering* per doz. 4/6 o 6

Danfordiae (*syn. Bornmüllerii*), a lovely flower resembling *I. reticulata*, but flowers bright golden, produced in February, ht. 3 in.; it delights in dry nooks on rockwork per 100, 40/-; per doz. 5/6 o 6

Fimbriata. See *Japonica*.

Flavissima Bloudovi, a pretty species, with attractive soft yellow flowers in May, ht. 9 to 12 in. 2 6

† **Fumosa**, a very rare Iris, closely allied and of similar character to *I. Sindjarensis*, but having yellowish flowers 2 6

† **Heldreichii** (*syn. stenophylla*), a beautiful Iris resembling in form *I. persica*, but having large flowers of a lovely lavender shade, with velvety violet falls reticulated white on the upper part, and with yellow crest, ht. 4 in.; a gem for rockwork and pots. FIRST-CLASS CERTIFICATE R.H.S. per doz. 21/- 2 0

japonica (*syn fimbriata*), a most lovely Iris from Japan, bearing on slender stems numerous pale lavender flowers having fringed standards and falls beautifully spotted with golden crest, $1\frac{1}{2}$ to 2 ft.; grown in pots in a cool greenhouse, it blooms in February and March, and is a real gem *Established in pots*, 1/- & 1 6

Juncea, S. and F. brilliant golden-yellow, one of the most beautiful and showy of bulbous Irises; invaluable to cut for vases, ht. 15 in. It prefers a rather dry and warm light soil per 100, 15/-; per doz. 2/3 o 3

A few extra large roots „ 3/- o 4

„ **Lacustris**, a pretty species from Lake Huron, thriving in damp or half-shady situations, flowers amethyst-blue with orange crest, ht. 3 in. 1 6

Lusitanica (*true*), S. varying from white to pale yellow, F. rich yellow, with orange blotch, handsome, ht. $1\frac{1}{2}$ ft. per 100, 10/6; per doz. 1/6 o 2

† **Orchoides**, flowers bright golden-yellow colour, produced in the axils of the leaves, April-flowering, ht. 1 ft. 3 6

† **Alata** (*Scorpion Iris*), a pretty winter-flowering Iris with flowers varying in shades of blue and purple-blue with golden keel on falls, ht. $\frac{1}{2}$ ft. It should be potted up early and plunged in a cold frame, and when well rooted be transferred to a cold greenhouse for winter flowering. *Extra strong selected bulbs* per 100, 21/-; per doz. 3/- o 4

Arenaria, forming little masses only 2 inches high of pretty canary-yellow flowers; a gem for dry sunny spots on rock-work in light soil per doz. 10/5 1 o

Boissieri, S. and F. rich purple, with golden-yellow blotch, June-flowering, ht. 9 in. 1 6

† **Bucharica**, a beautiful new bulbous Iris with large satiny white flowers, the falls having a delicate canary-yellow lip, ht. 1 ft. FIRST-CLASS CERTIFICATE R.H.S. per doz. 10/6 1 o

† **Caucasica**, primrose-coloured flowers, with silver-margined foliage, ht. $\frac{1}{2}$ ft. per doz. 10/6 1 o

IRIS - Bulbous and Tuberous-rooted—continued.

each - s d

Pavonia (<i>syn. Moraea glaukopis</i>), the Blue-eyed Peacock Iris , flowers pure white, each of the three petals having a clear sky-blue blotch; a gem for pots or select places out of doors, where it should be given a warm sheltered situation and a sandy peaty soil, ht. 1 ft.	<i>Strong home-grown bulbs</i> , per 100, 7/6; per doz. 1/3	0 2
‡ Persica , white suffused pale blue, the petals blotched purple and gold, very fragrant, ht. $\frac{1}{2}$ ft.	per doz. 15/-	1 6
" ",	<i>Extra strong flowering bulbs</i> , 21/-	2 0
‡ Pur-sind , a pretty hybrid of <i>I. persica purpurea</i> and <i>I. Sindjarensis</i> , producing rosy purple flowers shaded blue, ht. 4 to 5 in.; charming in pots or on rockwork		3 6
‡ Purpureo-persica , a lovely hybrid of <i>I. persica</i> , producing large fragrant flowers of a rich ruby colour, the falls having a handsome blackish maroon blotch and golden crest, AWARD OF MERIT R.H.S.		2 6
Reticulata , a most lovely and useful Iris producing out-of-doors in February, however cold, brilliant deep violet-coloured flowers with golden-yellow blotch, strongly violet-scented; a gem to naturalise in grass or borders and charming as a pot plant (3 to 5 bulbs in a pot), ht. $\frac{3}{4}$ ft.	<i>Strong bulbs</i> , per 100, 42/-; per doz. 5/6	0 6
" ",	<i>Extra strong bulbs</i> , 55/- ; , 7/6	0 8
" ",	<i>A few monster bulbs</i> , 10/6	1 0
Cantab , a charming little variety having sky-blue standards and falls of a pretty Oxford-blue with orange spot on white ground, delicately fragrant		7 6

See also Novelty List, page 10.

CUSHION IRISES.

(*Oncocyclus* and *Regelia* Irises.)

These Irises, most of which are natives of Palestine, form a distinct class by themselves, and are remarkable for their great beauty. The dormant roots may be planted outdoors or potted up from November to February. If planted outdoors a warm sunny situation is recommended, and by preference a raised bed ; the tops should be not more than $1\frac{1}{2}$ inches below the surface, and the soil a light and loamy one *thoroughly well-drained*, into which plenty of bonemeal and mortar rubbish has been worked ; give a light covering with dry heather until danger of severe frost is past, when the covering should be removed. Immediately the plants have done flowering place over them a hand light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain till November ; the object desired is to thoroughly ripen the roots, and prevent their starting into growth too early. Just as Winter sets in cover with three or four inches of dry heather or other light material in order to keep off heavy rains. **The *Oncocyclus* Irises like to remain undisturbed for years.** They are charming subjects for pots and take readily to a cold-frame treatment ; artificial heat they object to. *We offer only a few of the best, but many others can also be supplied.*

S. is used to signify **Standards**, or the erect petals ; *F.* **Falls**, or the drooping petals.

Selection—1 each of 15 distinct species, 15/-

each—s. d

Bismarckiana (*syn. Sari nazarena*), flowers large and beautiful, S. sky-blue, veined purple, F. veined reddish brown-purple on a straw-coloured ground, of easy culture, ht. $\frac{3}{4}$ ft.per doz. 8/6 0 9

Gatesii, a hardly robust species of the *Susiana* type, but with larger flowers, of a beautiful satiny creamy white, tinged rose, delicately veined and minutely spotted silvery grey, June-flowering, ht. $2\frac{1}{2}$ ft. *CERTIFICATE OF MERIT ROYAL BOTANIC SOCIETY* 4 6

Helenæ (*syn. I. Mariæ*), a lovely Iris, large and handsome, S. bright lilac, F. purple, veined black, with velvety black blotch. *FIRST-CLASS CERTIFICATE R.B.S.* ...per doz. 7/6 0 8

Iberica, a dwarf species of great beauty, with large handsome flowers, S. satiny white, veined dark purple, F. rich brown-purple, with black blotch, ht. 6 in.per doz. 7/6 0 8

Leichtlini, large handsome flowers, S. purple margined copper ; F. purple with coppery margin and azure-coloured beard, ht. $1\frac{1}{2}$ ft. 3 6

Lorteti, a great beauty, resembling *I. Susiana*, but rose-coloured ; one of the finest of this section. May-flowering, ht. 1 ft.*Strong flowering roots* 5 6

Nigricans (*The Black Iris*), bearing large handsome flowers, S. purple-black shaded maroon, F. crimson-black with black cushion ; the inside of flower is lighted up with golden-brown and yellowper doz. 8/6 0 9

Sofarana, a grand new Cushion Iris with very large handsome flowers, somewhat in the way of *Iris susiana*, finely veined and dotted violet on a dark grey ground, the falls having a large velvety black beard. *AWARD OF MERIT R.H.S.*per doz. 15/- 1 6

Susiana, a remarkably handsome species with immense flowers, bluish, tinted brown, and covered with a network of dark lines, May-flowering, ht. 1 ft. The easiest of all the Cushion Irises to grow*Extra strong roots*, per 100, 55/- ; per doz. 7/6 0 8

REGELIO-CYCLUS IRISES.

(Hybrid Cushion Irises.)

A beautiful new race of hybrid Irises, being crosses between the *Oncocyclus* and *Regelia* sections. The flowers, which resemble somewhat the *Cushion Irises*, are all prettily veined. Unlike the *Oncocyclus Irises* they are of fairly easy culture. They like a warm sunny situation and a thoroughly well-drained sandy loam soil enriched with well-decayed cow manure. If the soil is deficient in lime add some well-pulverised mortar rubbish. A raised bed against a south wall is a very suitable situation for these Irises. In planting let the tops be 2 inches below the surface and surround the roots with sand. During severe weather in winter give a light covering, such as dry heather, etc.

Selections—1 each of 10 distinct varieties, 21/-; 1 each of 5 distinct varieties, 12/-

each—s. d

Charon, large handsome flower with standards claret-brown shaded bronzy yellow at margin, falls finely lined velvety brown on a bronzy yellow ground. FIRST-CLASS CERTIFICATE R.H.S. 4 6

BARR'S FLAG IRISES.

Tall, Dwarf, and Japanese, etc. See our HARDY PLANT CATALOGUE.

IXIA.—The African Corn Lily.

GROUP OF IXIA FLOWERS.

A most graceful plant, bearing on wiry stems 15 to 21 inches high long loose racemes of bloom of remarkably rich and varied colours. All have a brilliant dark centre, and in the sun's rays present a picture of *gorgeous beauty*.

CULTURE IN POTS.—From October to January plant five or six bulbs in a four- or five-inch pot, using a compost of turf loam, leaf soil, and silver sand. Make the soil firm about the bulbs, and plunge the pots, up to the rim only, in ashes in a cold pit or frame, or under a south wall. Until a little top growth has been made no water should be given, and then only sparingly at first. When the plants are in growth, the lights should be left off except during wet or frosty weather. Early in February, or when sufficient growth has been made, remove the plants to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUTDOORS.—Plant from November to January, at a depth of three inches, and the bulbs two inches apart, on raised beds, in a prepared light loamy soil, in a sunny situation, protected if possible from cold east and northerly winds. When planting cover the bulbs with coarse sand. A covering of straw, litter, heather, or other light material will protect the early top growth from frosty winds, but it should be removed in March.

“ “ extra large bulbs	per 1000, 10/6	1 6

For Campanelle Jonquil and The Tall Double Jonquil, see Narcissus Odorus varieties, pages 29 and 33 of Daffodil Catalogue.

LACHENALIAS (Cape Cowslips).

Very beautiful greenhouse plants flowering in early Spring, with curiously spotted leaves and handsome flower-spikes. They should be potted as early as possible in Autumn in a compost of loam, sweet leaf soil, and sand and well-decayed cow manure, the bulbs being placed 2½ to 3 inches below the surface and surrounded by sand; place the pots in an airy greenhouse or cold frame close to the glass, and give very little water until the bulbs have made foliage. In early November, before cold weather sets in, the pots in the cold frame should be transferred to a sunny situation in greenhouse where the temperature does not fall below 45°. The Lachenalia likes abundance of sunshine but not overmuch heat. In May, remove the pots again to a cold frame fully exposed to sun, and gradually cease giving water so that the bulbs may ripen off. A very beautiful effect is obtained by planting Lachenalias in wire hanging baskets for greenhouse decoration.

LEUCOJUM AESTIVUM.

LEUCOJUM (Snowflake).

(Spring, Summer, & Autumn-Flowering.)

Leucojum vernum, the Spring Snowflake, is one of the earliest and most beautiful Spring flowers, handsome in outline and of elegant drooping habit. *L. aestivum* and *Hernandezii*, the Summer Snowflakes, flower in May, and their elegant blossoms are prized for bouquets. These Spring and Summer Snowflakes delight in shady situations. *L. autumnale* is a charming dainty little species. The varieties of *vernatum* require to be established before they flower freely; they should be planted as early in Autumn as possible.

autumnale (Acis), white and pink flowers in Autumn, each graceful in pots and on rockwork, etc., ht. 4 in.; grow in s. d pure sand in shade; quite hardy ...per 100, 9/6; per doz. 1/4 0 2

aestivum (Summer Snowflake), a handsome plant, bearing in May spikes of elegant drooping flowers, white tipped green, which are greatly prized for cutting, ht. 1 $\frac{1}{2}$ ft.

per 1000, 55/-; per 100, 6/-; per doz. 10d. —

Gravetye Giant, a grand new variety. See *Novelty List*, page 10.

Hernandezii (syn. *pulchellum*), an elegant species, resembling *Aestivum*, but differing in having a more drooping umbel of flowers, May-blooming, ht. 1 $\frac{1}{2}$ ft. per 100, 10/6; per doz. 1/6

vernatum (Spring Snowflake), a favourite little early spring flower with drooping bell-shaped flowers, white with small green or yellow tip, ht. 4 to 6 in. per 100, 5/6; per doz. 10d.

vernatum carpathicum (syn. *Wagneri*), a robust-growing variety of the Spring Snowflake, with larger flowers, white prettily tipped canary-yellow or green; valuable for edgings, masses at foot of rock-work, and for naturalising in grass, etc. Extra strong bulbs, per 1000, 70/-; per 100, 7/6; per doz. 1/3

BARR'S LAWN GRASSES FOR SEPTEMBER SOWING.

Lawns should be renovated in September, after the wear and tear of Summer, sowing at the rate of 1 lb. per 100 square yards. For prices, etc., see page 2 of cover.

BARR'S BEAUTIFUL LILIES,

For Naturalising in Flower and Shrubbery Borders, and for Greenhouse Decoration.

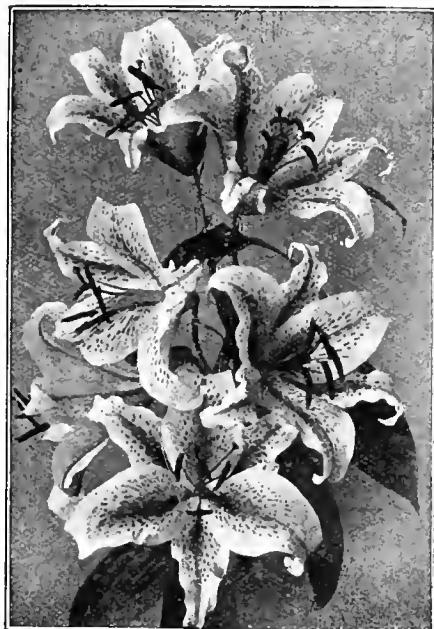

For chasteness and beauty of colour and form, the **Lily** stands pre-eminent amongst hardy plants, and by a judicious selection of species a continuous display of bloom can be maintained in the flower garden or greenhouse from May to October. In the flower or shrubbery border they are most effective when planted in bold groups, while isolated clumps on lawns of the taller-growing Lilies produce a fine effect.

General Hints on Culture.

Lilies planted out-doors.—The conditions essential to success in growing Lilies may be generally summarised thus:—**A cool rooting medium; Perfect drainage; and Shade from hot sun.**

These conditions can be readily fulfilled in the borders of Rhododendron and Azalea beds, or amongst the various subjects grown in the herbaceous and shrubbery border. In such positions the young Spring growths are protected from cold winds, and the ground is kept shaded and cool by the shade of the surrounding plants. This is especially useful in the case of those Lilies which make *stem roots*, as these are only developed freely in shade. On these roots, which are produced at the base of the stem, the flower-head largely depends for its successful development, and the bulb for its preservation. As soon as they appear a light covering of good rich soil should be given, into which they can root freely. **The chief stem-rooting Lilies in the following list are marked thus δ .** There are others which are less dependent on these stem roots, which they only produce when the bulbs are planted on rich soil and in shade.

In preparing the ground for Lilies loosen the soil to a depth of 2 feet or more, and add or fill in the necessary compost (see notes below). Plant the bulbs with their tops 2 to 3 inches below the surface, surrounding and covering with sand, and then top-dress with a compost of light soil and well-decayed manure, working in pieces of burnt or charred wood. As growth advances a mulching of light rich soil should be occasionally given, and during the growing period the plants should be freely watered. In late autumn cut down the old flower-stems and give a light covering of leaves or peat-fibre.

LILUM AURATUM.

Lilies in Pots.—Any one with an unheated greenhouse can easily have a very beautiful show of Lilies in pots during the summer months. The varieties specially recommended for this culture are *Auratum*, *Speciosum*, *Tigrinum*, *Chalcedonicum*, *Umbellatum*, *Elegans*, *Testaceum*, *Hansoni*, *Henryi*, *Giganteum*, *Brownii*, *Brownii* var. *odorum*, *Longiflorum*, *Kramerii*, and *Rubellum*.

In potting use a compost of fibrous loam and sweet decomposed leaf soil, with plenty of coarse sand or a mixture of good peat, loam, and sand, adding to the compost a few pieces of charcoal. *See that the drainage is perfect.* The pots should be carefully washed and allowed to dry before using; new pots should be well soaked; *never use wet or dirty pots.* In order to destroy all injurious insect life it is a good plan to sterilise the soil to be used for potting; we recommend for this purpose the KONDINE SOIL STERILISER, price 40s. (full particulars on application), or small quantities of soil can be sterilised in a sack, pouring over it a large kettle of boiling water, and then spreading out the soil to dry. This will prevent a great deal of after trouble from worms or insects attacking the bulb roots. Pot firmly, barely covering the top of the bulb, and leaving room to add more soil when the surface roots appear. Select a situation out of doors, protected from the afternoon sun, and stand the pots on a bed of ashes raised above the general level to avoid stagnant moisture, and make firm to prevent the entrance of worms; then cover with 6 inches of peat-fibre or old leaf soil to keep off excessive rains.

When top growth begins to show above the covering, remove the pots to a cold frame, pit, or greenhouse, and start giving water sparingly; a little *clear weak liquid manure given twice a week* when the flower-buds are well advanced will greatly assist in the development of fine blooms. A north wall or hedge is a suitable situation for starting the bulbs. If very early flowers are required the plants may be transferred from the cold frame into a *gentle heat*, but must be kept as near the glass as possible to prevent their getting drawn. Shade should be given to the lower portion of the stems to induce free stem-roots, and these should be top dressed as they appear. Give air freely, and fumigate if required. When coming into bloom a little weak manure-water will be of great assistance to the plants. The *Liliums Nepalense*,

LILIES—CULTURAL NOTES—continued.

Philippinense and Wallichianum require to be started in the greenhouse (see *cultural directions in following pages*).

To those desiring further information regarding Lilies, we commend the following books: Miss Jekyll's "Lilies for English Gardens," 8/10 *post-free*; "The Book of the Lily" (by William Goldring), 2/9 *post-free*; "Lilies" (by A. Grove), 1/9 *post-free*.

¶ The majority of Lilies are not ready for dispatch before the beginning of November; a few sorts, however, are ready earlier, such as Candidum, Croceum, longiflorum, etc., while some of the Japanese imported varieties do not arrive until December. Orders for Lilies will therefore be executed, if necessary, in two or more parts.

Soils and Situations Recommended for Different Lilies.

|| Indicates those Lilies of easiest culture, being strong free growers thriving in most soils. Where soil is very dry and poor, add loam and peat, or leaf soil; where heavy and damp, add sand and leaf soil. All require good drainage and plenty of moisture while in growth.

Ω Indicates those Lilies requiring a good friable soil, not too dry, and the addition of a little peat is advisable. The lower part of the stems should be kept in shade.

¶ Indicates those Lilies delighting in shady and moist situations, sheltered from strong winds. A well-drained peat soil, where there is bottom moisture for the bulbs to root into, is recommended. Where a brook, stream, or pond is available, they may be planted at the margins, where the bulbs can remain moderately damp, and the roots find all the moisture they require below. In planting cover and surround bulbs with sand.

δ Indicates the chief *stem-rooting* Lilies. (See CULTURAL NOTES.)

BARR'S SELECTIONS OF BEAUTIFUL LILIES.

For Greenhouse decoration,	25 in 25 beautiful named vars.,	£1 15s., £1 10s., & £2 2s.

N.B.—For the interest of buyers we have added, after the name, the plant's native country.

Ω **Auratum** (The White Golden-rayed Crimson-spotted Hill Lily of Japan), ht. 4 to 6 ft. This is indeed the *Queen of Lilies*, and should have a place in every garden and greenhouse. It commences to bloom in August and continues on into September. It is of simplest culture and perfectly hardy. Those who have beds or borders of Rhododendrons should plant this grand Lily freely amongst them for a succession of bloom. Growing amongst Peonies, and along the margins of evergreens, groups of **L. auratum** (6 to 12 bulbs in a clump, planted 9 inches apart), produce a grand effect. As isolated subjects on large lawns, groups of **Lilium auratum** look very handsome and stately. A situation should be chosen where the plants are sheltered from cutting winds and screened from the midday sun; on slopes, in a free soil, moist but not wet, this Lily does well, and makes a fine effect.

We are expecting our first consignment of this beautiful Lily to arrive in December from Japan, and we are booking orders for delivery immediately on arrival, at the following prices. The larger-sized bulbs produce the most flowers.

Ω Auratum	Extra Large Bulbs, each 1/6; per doz. 15/-; per 100, 105/-	each
"	Splendid Large Bulbs, each 1/-; per doz. 10/6; per 100, 75/-

⁶ Tigrinum	—the Tiger Lily (<i>China and Japan</i>), a remarkably handsome section, with abundance of large showy brilliantly coloured flowers, lighting up the garden in <i>August</i> and <i>September</i> . All very hardy vigorous growers.	
”	Fortunei , having a woolly stem and producing on bold branching heads up to 20 rich orange-scarlet flowers, spotted crimson-brown, ht. 4 ft.	per 100, 17/6; per doz. 2/6 o 3
”	” giganteum , a grand robust variety of <i>Fortunei</i> , growing taller, bearing more flowers, and later to bloom, ht. 6 ft.	per 100, 42/-; per doz. 5/6 o 6
”	” ” flore-pleno , flowers very large, double orange-scarlet, handsome, ht. 6 ft.	Very large bulbs ” 7/6 o 8
”	sinense flore-pleno , double orange-scarlet flowers, lasting long in bloom, ht. 4 ft.	per 100, 17/6; per doz. 2/6 o 3
”	splendens , very handsome, with large pyramidal heads of bright fiery orange-scarlet flowers, covered with large crimson-brown spots, ht. 6 ft.	per 100, 14/6; per doz. 2/- o 3
⁶ Umbellatum (<i>Europe</i>), a very showy section of Lilies, bearing in <i>June</i> large handsome flowers; very effective when grouped in shrubbery and flower borders, also good pot plants.		
”	erectum , cerise-scarlet, shading to yellow, ht. 2 $\frac{1}{2}$ ft.	per 100, 25/-; per doz. 3/6 o 4
”	grandiflorum , large handsome heads of bright orange-red flowers, ht. 2 ft.	per 100, 21/-; per doz. 3/- o 4
”	Incomparable , intense rich crimson, freely spotted, a handsome showy variety, ht. 2 ft.	per 100, 27/6; per doz. 3/9 o 4
”	Sappho , scarlet, shading to orange, moderately spotted, ht. 2 ft.	per 100, 27/6; per doz. 3/9 o 4
”	Fine Mixed Varieties , ht. 2 to 3 ft.	” 15/-; ” 2/3 —
”	Wallichianum (<i>N.E. India</i>), a very elegant and beautiful fragrant Lily with large cream-coloured trumpet-shaped flowers, slightly tinged primrose and green, anthers yellow, stems clothed with graceful narrow foliage, 3 to 4 ft. Easily grown in any ordinary greenhouse	per doz. 15/-, 21/-, & 27/6; each 1/6, 2/- & 2 6
² Washingtonianum purpureum (<i>Oregon</i>), a fine variety bearing in abundance large handsome sweet-scented flowers, white tinged and spotted a vinous purple, and changing ultimately to a rich deep purple, ht. 3 to 4 ft. We offer this in preference to the type (<i>L. Washingtonianum</i>) as being a more reliable grower. Plant the bulbs with the top 6 in. deep in fibrous loam in partial shade.....	Extra Large Bulbs	2 o 2 9

x LILY OF THE VALLEY,

For forcing, and making plantations out of doors.

The **Forcing Crowns** offered below we recommend for general forcing, to come in after Christmas. For flowering before and at Christmas the **Retarded Crowns** should be used. For outdoor culture the **Old English Crowns** are recommended.

DIRECTIONS FOR FORCING.

Plant 15 to 20 crowns in a 5-inch pot, shaking in a little light soil amongst the roots, until they are tightly potted; leave the crowns free above the soil and a little below the rim of the pot. Place on bottom heat in a *moist atmosphere*, with a temperature of 80 to 85 degrees (if forced in March a temperature of 70 to 75 degrees will be sufficient), and cover the crowns with a little cocoa fibre or moss, which remove when top growth is showing. *Tepid water* should be frequently given, care being taken that it *penetrates to the centre of the clump*. To encourage simultaneously the development of flower and foliage, keep a flower-pot inverted over the crowns, until flower and foliage have made some progress, when gradually admit light. *A dry atmosphere*, or *an insufficient supply of water at the roots*, will cause the crowns, technically speaking, to go “blind.” Where large quantities of Lily of the Valley blooms are required for cutting, the crowns should be planted rather thickly in boxes and receive the treatment described above.

FORTIN'S GIANT LILY OF THE VALLEY.

LILY OF THE VALLEY—*continued.*

OUTDOOR CULTURE OF LILY OF THE VALLEY.

Out-of-doors the Lily of the Valley likes a partially shaded and moist situation. The best results are obtained on a shady border against a wall, placing the crowns 6 to 9 inches apart and leaving them to establish themselves. The soil should be a good loam enriched with manure and a top dressing of old manure should be given annually. The plants should not be allowed to remain more than three years in one spot. The crowns are best planted in November, but planting may be done up to February.

✗ **Barr's Finest English Forcing Crowns**, of best selected quality, suitable for general early forcing per 1000, 90/-; per 100, 9/6; per doz. 1/4

✗ **The Old English Lily of the Valley**, for outdoor planting, the true old variety of Lily of the Valley, suitable for naturalising in woodlands, etc. Very sweet-scented per 1000, 65/-; per 100, 7/-; per doz. 1/-

✗ **Strong selected clumps**, for outdoor planting or slow forcing in pots, per doz. 15/-; each 1/6

✗ **Fortin's Grand Giant Strain, English-Grown**, a very beautiful strain with remarkably large handsome bells on long sturdy stalks. The extra strong crowns offered may be potted and brought on *very slowly* under glass, but they must not be potted or boxed up before February; ordinary forcing will cause them to go *blind* **Extra strong crowns**, per 100, 17/6; per doz. 2/6

,, **Strong Planting crowns** for planting in beds and borders „ 12/6; „ 1/9

RETARDED LILY OF THE VALLEY,

Suitable to force for Autumn, Winter and Summer flowering.

The Retarded Crowns will bloom in three to four weeks from time of potting, but the crowns started in November require a little more time. It is necessary that they be planted *as soon as received*, and grown on rapidly without any check. In July and August all that is needed is to place them in a cold frame, and they come along quickly with very little attention. Later on however, when the nights become cool, the temperature must be raised to that of the day.

The plants should be kept fairly dry overhead, and a warm moist atmosphere should be maintained. As the retarded crowns make a vigorous foliage it is advisable to remove one out of three leaves, as this will assist the development of the flower spike. They may be grown successfully in bowls for house decoration in our Fertilised Peat-fibre Mixture.

Finest Retarded Crowns, supplied as required from July to November.

per 100, 12/6; 25 for 3/6

Finest Selected Fortin's Giant Retarded Crowns, supplied as required from July to November. These take a few days longer to develop their flowers than the *Ordinary Retarded Crowns* per 100, 21/-; 25 for 5/6

✗ **Not less than 25 Retarded Crowns supplied.** A few days' notice required, as the crowns are kept in cold storage.

✗ **MEDEOLA asparagooides** (Smilax). See our Spring Catalogue of Bulbs and Tubers.

METHONICA superba. See *Gloriosa superba*.

MILLA (Triteleia). Plant Uniflora violacea from Sept to Nov., Bisflora in Spring. per doz.

uniflora violacea (Spring Star Flower), a charming little hardy plant from Buenos Aires; producing in spring fragrant flowers of a pretty pale porcelain-lilac with violet stripe down petal, ht. $\frac{1}{2}$ ft. Naturalised on grassy banks or on rockwork, this plant produces a lovely effect from March to May; it is also valuable for small beds and edgings. By gentle forcing it may be had in bloom from January to March. A pretty effect is obtained by growing *Milla uniflora* in saucers or bowls of live sphagnum moss, also in hanging baskets per 1000, 20/-; per 100, 2/3 o 4

✗ **biflora.** See our Spring Catalogue of Bulbs and Tubers each, 8d. 7 6

✗ **MONTBRETTIA**, a family of most decorative hardy bulbous plants of elegant growth, and producing freely in early August graceful spikes of gorgeously coloured flowers, which are of the greatest value for cutting, lasting long in water and mixing well with all kinds of foliage. They grow freely in any ordinary flower-border enriched with manure, but prefer a sunny situation. As pot-plants they are charmingly graceful.

Plant outdoors November to March, cover the earlier plantings lightly with litter.

☞ Any other species of *Muscari* in commerce not mentioned above can be supplied if required.

NARCISSUS POLYANTHUS, or NOSEGAY DAFFODILS.

POLYANTHUS NARCISSUS. PAPER-WHITE "SNOWFLAKE" GROWN IN BOWL.

The Polyanthus Narcissi or Nosegay Daffodils produce large heads of sweet-scented flowers, and are specially adapted for Winter and Spring decoration in pots and jardiniets, etc. The culture is the same as for Hyacinths. For flower beds and mixed borders they are great favourites, and produce a charming effect. Plant from September to November, and at the approach of winter give a light covering of long litter or other material to keep off severe frosts; remove the covering in March. The earlier plantings give the best results.

Where flowers are in demand from November to January, the Paper White "Early Snowflake" and "Double Roman Narcissi" are of great value for forcing with the Roman Hyacinths; they are all suitable for growing in Bowls in Fibre Mixture (see *Culture*, page 3).

NARCISSUS POETAZ—NEW HYBRID POLYANTHUS NARCISSI.

(Hybrids of Polyanthus Narcissi × *Narcissus poeticus ornatus*.)

A very decorative new class of Nosegay Daffodils or Polyanthus Narcissi, growing taller than the old varieties, with a less stiff habit, and a looser head of flowers, which are larger and more elegantly formed. They also have the merit of being much hardier. Besides being good border plants they are valuable for culture in pots and jardiniets, and will bear gentle forcing. The flowers of these new Narcissi are all delightfully fragrant, and will be found of great value to cut for vases or bouquets.

Admiration , new 1914, the showiest of the Poetaz varieties and very decorative either for pots or border; it produces a head of large well-formed flowers, primrose with flattish bright red-orange cup, delicately scented, ht. 18 in. THE SACRED, OR GOOD LUCK LILY of China and Japan.

Called by the Chinese "Jos Flower," or "Flower of the Gods," and "Water Fairy Flower."

This species of *Polyanthus Narcissus*, which we annually import from Northern China, is prized for the abundance of its flowers and its marvellously rapid growth. The flowers are white, with yellow cup, and very fragrant; they are mostly single, but a few doubles are sometimes found amongst them. Each bulb produces several flower-spikes, bearing many flowers. In China and Japan the bulbs are grown in the living-rooms in fancy bowls filled simply with pebbles and water, and the natives compete with one another in growing the finest specimens for their New Year's Festival, successful culture being regarded as an emblem of "Good Luck." The bulb in this country can be grown as successfully as in China, in pebbles and water or peat-fibre mixture (see page 2), and it is most interesting to watch its rapid growth, which is about 20 inches in forty days; place in a sunny window by day and on a table near the centre of the room by night, as frost destroys the flower-buds. The natural atmosphere of a warm greenhouse is of course most suitable, and we can strongly recommend this flower for CHRISTMAS FORCING.

Owing to the war our supply of these bulbs from China this year is doubtful, but we can book orders conditionally for supply in October at the following prices.

A HYBRID NERINE.

NERINES.

BARR'S BEAUTIFUL NEW VARIETIES.

For Autumn decoration in the greenhouse few plants can compare with **Nerines** for their brilliant and attractive colours, which form a pleasing contrast to the prevailing tints of this period of the year. The flowers, which are produced in umbels of 6 to 24 blooms, are borne on stout stems varying in height from 1 to 2 ft. In colour they range from *dark red*, *vivid crimson*, *cerise*, and *scarlet* to *salmon*, *coral-rose*, *pink*, *blush*, and *white*, many having a glistening lustre which in sunlight gives them the appearance of being dusted with gold or silver. They remain decorative for many weeks, and their beauty may be enjoyed in a sitting-room as well as the greenhouse, if the pots are kept in a sunny window.

The cut spikes, which last fresh a long time, are greatly appreciated for table decoration associated with light graceful foliage like that of Maidenhair Fern.

The varieties we offer below are mostly **New Seedlings**, comprising new shades of colour and new forms; they are freer bloomers, and in some cases of taller growth, and with larger flowers than any of the older kinds.

CULTURE.—**Nerines** are very easily grown by anyone who has a glass structure from which frost can be excluded. *Plenty of air and sunshine* are their principal requirements. After the bulbs have finished flowering, place the pots on an airy sunny shelf close to the glass, and encourage a free foliage growth by giving occasionally a little weak liquid manure. In April or May, when the foliage commences to turn yellow, cease giving water and allow the bulbs to ripen off in their pots. As soon as the plants show signs of making fresh growth in August or early September, stand the pots in saucers of water for a few hours to ensure the soil being uniformly moist, and then give water sparingly until the flower spikes are well advanced.

manure. In April or May, when the foliage commences to turn yellow, cease giving water and allow the bulbs to ripen off in their pots. As soon as the plants show signs of making fresh growth in August or early September, stand the pots in saucers of water for a few hours to ensure the soil being uniformly moist, and then give water sparingly until the flower spikes are well advanced.

NERINES—continued.

Nerines bloom most freely when well established in pots. They should be repotted every third or fourth year. In potting, put in plenty of crocks to ensure good drainage, and use a compost made up of two-thirds good loam and one-third sand, with a sprinkling of well-decayed leaf soil or old manure and bonemeal.

Our fine collection of **New Hybrid Nerines** at our Taplow Nurseries is well worth seeing in autumn.

	each-s. d

Innocence , having trumpet-shaped flowers of a silvery white with pink stripe down the centre of petals, pretty	5 6
Joyce , soft coral-pink with mauve-coloured stripe down petals, pretty	7 6
Lady Bromley , bearing a large umbel of flowers with long narrow petals, colour pink with deeper red stripe	5 6
Lothario , flowers soft rose with a deeper rose-coloured stripe down petals	5 6
Margot , flowers open of fair size, colour light coral-red with deep broad band of deeper coral running down the petals	5 6
Nancy , flowers open and semi-reflexed, petals rather narrow, rose-pink with deeper stripe...	4 6
Pink Beauty , flowers of medium size, clear rose-pink, pretty and distinct	7 6
Princess May , flowers large, white flushed pink with prettily waved petals	5 6
Proserpine , bearing a fine umbel of large flowers, clear pink, slightly lighter coloured towards centre, and with rose stripe half-way up petals	7 6
Queen of Roses , producing a large umbel measuring 6½ inches across, flowers lustrous carmine-rose, of fair size with narrow petals slightly recurring. (See illustration in <i>The Garden</i> , May 23rd, 1914)	12 6
Rosebud , flowers trumpet-shaped, petals broad, pink with white centre, and a short stripe running down the centre	10 6
Rotherside , large handsome umbel of rich orange-salmon flowers, well-formed, with thick broad petals, tall	7 6
sarniensis (<i>Guernsey Lily</i>), a superior variety of the type from Cape Colony, producing handsome umbel of flowers varying from deep salmon-rose with scarlet glow to deep lustrous pink, very showy, ht. 1 to 1½ ft.	per doz. 7/6
" ingens , fine umbel of large flowers, pretty rose shade with scarlet sheen, petals undulated at margin	0 9
Scarlet Beauty , having a large umbel of flowers which are of a brilliant orange-scarlet self, a colour more intense than that of <i>Fothergill major</i>	2 6
Snowdon , a seedling of <i>Flexuosa alba</i> , flowers white with faint pink stripe and prettily waved petals	7 6
	10 6

NERINES—continued.

each—s. d

Starfish , flowers with long narrow petals, soft pink with rose stripe, early	2	6
The Moor , flowers a very curious and distinct colour, being of a clouded mauve with scarlet lines running up the petals	7	6
undulata (<i>syn. crispa</i>), small pale rose flowers, petals elegantly curled ; a dainty little species, ht. $\frac{3}{4}$ ft.	1	6
Vivid , flowers vivid orange-scarlet, very showy	5	6

ORNITHOGALUM (**Star of Bethlehem**), very pretty hardy bulbs, flowering in Spring and early Summer. PYRAMIDALE, NUTANS, and UMBELLATUM are charming plants for naturalising in woodlands, meadows, etc. ; the two latter will thrive in dense shade where few other plants will grow. Plant September to November.

arabicum, bearing in June handsome fragrant white flowers with glistening black central boss and yellow anthers. Well-grown specimens produce heads bearing as many as 20 flowers, measuring 2 inches across. Plant on warm sunny south borders 6 inches deep, and slightly protect during winter ; by slight forcing it may be had in bloom by Easter, ht. $1\frac{1}{2}$ ft. After flowering the bulbs should be well ripened off, if out-of-doors, by placing a hand-light over them, or if in pots by exposing them to full sun.

Extra selected bulbs, per doz. 2/6 o 3

montanum, a charming little dwarf **Star of Bethlehem**, bearing in spring umbels of dainty star-shaped white flowers, ht. $\frac{1}{2}$ ft. ; a most valuable bulb for massing and edgings, also useful for naturalising in grass, woodlands, etc. per doz. 1/9 o 2

narbonense, resembling *O. pyramidalis*, but of more graceful habit, bearing in early summer elegant spikes of snow-white flowers ; a charming border plant, ht. 2 ft. per doz. 3/6 o 4

nutans, elegant spikes of silvery grey flowers, outside shaded pale sea-green, beautiful ; valuable for cutting and naturalising in woodlands, etc., ht. 1 ft. per doz. 2/6 o 3

pyramidalis, a very beautiful bulbous plant, producing in early June large spikes of beautiful snowy white flowers ; very attractive in borders, ht. 2 ft. per doz. 3/6 o 4

umbellatum, the old **Star of Bethlehem**, producing in late Spring umbels of starry white flowers, ht. 1 ft. ; valuable for naturalising per 100, 3/6 ; per doz. 6d. —

umbellatum splendens, a large handsome form of the above, bearing handsome umbels of pure white starry flowers ; very effective in masses and edgings, and valuable to naturalise, ht. $1\frac{1}{2}$ ft. per 100, 6/6 ; per doz. 1/- —

OSTROWSKYA magnifica, a grand herbaceous perennial, bearing in summer immense bell-shaped flowers 6 inches in diameter, satiny white with silvery lilac sheen, ht. 3 ft. FIRST-CLASS CERTIFICATE R.H.S. Plant in a light well-drained gritty or sandy soil against a sunny wall, and slightly protect in spring Strong roots 1 6
Extra strong roots 2 6

OXALIS (**Wood-Sorrel**), remarkably pretty little subjects delighting in hot dry positions on rock-work, etc., planted in a light sandy soil. In autumn they should be lifted and stored in dry soil or sand, being potted up in early spring for cold greenhouse, or planted out later for summer blooming. They all make pretty pot-plants.

brasiliensis, a beautiful species producing an umbel of handsome purple-crimson flowers ; easily grown in a cold greenhouse, potted up in October per 100, 10/6 ; per doz. 1/6 —

cernua var. bermudiana (**The Bermuda Buttercup**), a charming bulb for Winter flowering indoors, producing elegant terminal clusters of graceful bright yellow flowers for weeks. Pot up early in autumn, and then place in a sunny window, or greenhouse ; the bulbs may also be potted later, kept in a frame, and planted out in spring. per 100, 5/6 ; per doz. 10d. —

enneaphylla. See our Hardy Plant Catalogue.

× **floribunda**, producing from summer to autumn a profusion of charming rose-coloured flowers with dark veins, ht. 8 in. per 100, 8/6 ; per doz. 1/3 o 2

× „ „ **alba**, producing an abundance of beautiful white flowers, ht. 8 in. per 100, 10/6 ; per doz. 1/6 o 2

× **lasiandra**, very handsome and distinct, with large deep green leaves and woolly stems, and umbels of bright rosy crimson flowers, ht. 9 in. per 100, 5/6 ; per doz. 1/6 —

× **purpurata** (*syn. Bowiei*), having large brilliant rose-coloured flowers and elegant foliage, ht. 6 in. per 100, 10/6 ; per doz. 1/6 o 2

× **PANCRATIUM calathinum**. See Hymenocallis, page 44.

illyricum, bearing beautiful white flowers, with long filamentous outer segments. It makes a fine pot-plant or may be planted under a south wall (the top to be 6 inches below the surface), ht. 2 ft. Large bulbs, per doz. 21/- 2 0

Extra large bulbs 2 6

maritimum (**The Sea Daffodil**), flowers white and delightfully fragrant ; a handsome plant for pot-culture, or to plant under a south wall (the top to be 6 inches below the surface), ht. $1\frac{1}{2}$ ft. per doz. 5/6 o 6

PHÆDRANASSA (Queen Lily). See our Spring Catalogue of Bulbs and Tubers.

POLIANTHES tuberosa. See Tuberose, page 74.

POLYANTHUS Narcissus. See Narcissus, page 65.

POLYGONATUM MULTIFLORUM GROWING IN A POT.

× **POLYGONATUM** (Solomon's Seal, or David's Harp), very graceful shade-loving plants, valuable for naturalising in woodlands, wild gardens, shady flower borders, etc. They make very elegant pot-plants, and may be forced into bloom by February. Plant November to February.

macrophyllum, the Large-leaved Tall Solomon's Seal, very handsome, ht. 3 ft.

per 100, 12/-; per doz. 1/9 o 2

macrophyllum robustum, a remarkably fine variety forming tall robust plants with large handsome foliage and long graceful spikes of white flowers, ht. 3 ft., per 100, 21/-; per doz. 3/- o 4

multiflorum, the Tall Solomon's Seal, a fine bold plant of graceful habit, having arching leafy stems with pendent white flowers, ht. 2 ft.

per 100, 10/6; per doz. 1/6 o 2

officinale, the Dwarf Solomon's Seal, of dwarf graceful habit with elegant white flowers, ht. 1 ft. per 100, 10/6; per doz. 1/6 o 2

PUSCHKINIA scilloides compacta (The Lebanon Squill), a beautiful little April-flowering bulb, prized for the permanent flower border and for rockwork; it is also a lovely indoor pot-plant (6 bulbs in a pot); the flowers are white, shaded and striped soft clear blue, ht. 6 inches. Plant from September to November..... per 1000, 42/-; per 100, 4/6; per doz. 8d.

DOUBLE TURBAN RANUNCULUS.

RANUNCULUS.

Turco-Persian, Turban and Persian.

Nothing produces a brighter or more gorgeous effect in May and June than beds of Ranunculus; the flowers are all good for cutting, and the culture is very simple. They thrive in any ordinary garden soil, but should have protection in spring from sharp winds.

CULTURE.—Plant the **Double Turban Ranunculi** from November to March (the earlier the better), and the **Turco-Persian** and **Persian** during February and March. Set the tubers 3 or 4 inches apart, pressing them firmly into the soil, *claws downwards*, and covering them with sand, then with soil; keep the crown of the tuber two inches under the surface. After planting cover the ground with *cut heather, or other light material*, which remove when the plants appear above ground. In April a slight mulching of well-decayed manure will be found beneficial, and during dry weather the plants should be given abundance of water. If grown

as pot-plants put three tubers in a 4-inch pot, and plunge out of doors for a time.

RANUNCULUS, Double Turban or Turkish, ht. 3 ft.

The flowers of the **Turban Ranunculus** are large, rose-like, and self-coloured. In beds, ribbons, and masses in the borders, the rich *yellow*, bright *orange*, brilliant *scarlet*, beautiful *rose-carmine*, and pure *white* flowers are very effective in spring.

RANUNCULUS asiaticus superbus—**Sicilian Strain**, a remarkably pretty and distinct strain of large-flowered Ranunculi with double, semi-double, and single flowers of the most brilliant and varied colours, the petals of many being elegantly flanged and cut per 1000, 30/-; per 100, 3/6; per doz. 6d.

RANUNCULUS, Double Persian, for Beds, Borders, and Masses, very attractive on account of their finely formed very double flowers, and their rich varied brilliant colours.

Extra fine mixed , a magnificent variety of colours, for beds, borders, and masses	per 1000, 10/6; per 100, 1/6
---	------------------------------

RANUNCULUS—Single Scarlet from Palestine , flowers single, brilliant vermillion to orange-scarlet, with prettily crinkled petals and a black central boss; a very showy plant for flower beds and borders. Plant out of doors in February or March, or the roots may be potted up earlier and gently forced	per 100, 8/6; per doz. 1/3
--	----------------------------

× **RICHARDIA (Calla or Arum Lily)**, a charming family of greenhouse plants. **R. africana** and its varieties should be grown out of doors during Summer and be brought into the greenhouse at the approach of Winter. The other species should be kept dry, away from frost during Winter, and be started in a gentle bottom heat in February or March. They may then be grown on in pots for greenhouse decoration or planted out of doors in a sheltered position in May. In the latter case the natural soil should be taken out to a depth of 9 inches, and be replaced by a rich compost, as these plants are gross feeders. Abundance of water should be given as growth proceeds.

" **alba**, dainty little spikes of white flowers, very pretty... " 12/6; " 1/9 o 2

Verna, producing dainty little heads of lilac-blue flowers; charming for naturalising on rockwork, etc., ht. 3 in.....per doz. 3/6 o 4

SCILLAS (Wood Hyacinths)—May-flowering. Our native species (*Scilla nutans*), with its long pendent bells, abounds in most parts of the country. The fine Spanish varieties (*S. hispanica*) have erect flower-spikes and open campanulate flowers. *Scilla patula* and its varieties have a robust tall habit with large campanulate open flowers. All are very effective in flower and shrubbery borders, and most valuable for wild gardens and woodlands, where they should be largely naturalised; they seed freely and quickly establish themselves. They also make charming pot-plants, and may be forced into bloom by March. **Wood Hyacinths** succeed in shady flower borders and bare shady places, and odd corners which often have a desert-like appearance in the flower garden can by their use be rendered bright and cheerful. They will also thrive under Fir and Pine trees, where few other plants will grow. Plant September to November 6 inches deep to obtain fine flower-spikes.

Hispanica (*syn. Campanulata*), plants of erect habit, with handsome spikes of open campanulate flowers.

STERNBERGIA (The Lily of the Field). These charming bulbous plants require a warm sunny aspect and a good deep light soil; they should be planted early in Autumn 6 inches deep and be left to establish themselves; plant Sedums over them, or cover in winter with dry litter. On limestone soils they are most at home. Planted under Fir and Beech trees with a genial aspect they also do well.

Fischeriana, a handsome form from Asia Minor, producing its clear yellow flowers in early Spring; suitable for sunny spots in the rock garden or for pot culture.....per doz. 3/6

lutea major (*syn. angustifolia*), a very effective Autumn-flowering bulbous plant. Bulbs planted in August produce within a few weeks large handsome crocus-like flowers of a rich golden-yellow. They make a charming room decoration planted in August or early September in bowls of our fibre and charcoal mixtureper 100, 12/6; per doz. 1/9

macrantha, having very large canary-yellow flowers in Autumn, blooming a little later than
S. lutea major, shorter-stemmed and with greyish green foliageper doz. 3/6

TECOPHILÆA cyanocrocus (Chilian Crocus), a most beautiful Chilian Spring-flowering bulb, bearing large Crocus-like flowers ranging from dark to light blue with white throat, delicately scented, ht. $\frac{1}{2}$ ft. It is easily grown in the south of England and mild districts in a deep sandy loam well drained, and exposed to full sun. In cold districts the bulbs should be given a cold frame treatment but no artificial heat. When established, it blooms freely each year. Plant the bulbs in October

x THLADIANTHA dubia, a rapid-growing climber. See Spring Bulb Catalogue

x TIGRIDIA Pavonia (The Tiger or Shell Flower of Mexico).

Few flowers are so gorgeously coloured as the **Tigridias**. The **bulbs** are supplied from December to May; for greenhouse decoration, pot up as soon as received and plunge in a cold frame, withholding water till the foliage appears, then giving sparingly at first. Those bulbs intended for outdoors should be stored in soil or peat (not quite dry) away from frost, till March, and then be planted in sunny positions in the flower border in well-drained soil, the bulbs being surrounded with sand. Beds of **Tigridias** make a gorgeous picture during July, August, and September, and should find a place in all gardens.

grandiflorum (Wake-Robin), large snowy white flowers ...per 100, 32/6 ; per doz. 4/6	0 5
recurvatum , prettily recurved purple flowers, foliage marbled	10/6 1 0
sessile , dark chocolate flowers, strong grower	7/6 0 9
" californicum , large creamy white flowers and handsome spotted foliage, ht. 2 ft. FIRST-CLASS CERTIFICATE R.H.S.per doz. 10/6	1 0
" Snow Queen (new), bearing large handsome white flowers ..,	15/- 1 6
stylosum , large white flowers, flushed rose	8/6 0 9

TRITELEIA. *See* **Milla**.

TRITONIA, charming little hardy Cape bulbous plants producing in Summer showy flowers ranging in colour from *buff* to *rose* and the *richest glowing orange*, and having a beautiful transparency. Grown in pots they are most decorative. *Culture* same as for *Ixias*.

Mixed varieties	per 100, 6/6 ; per doz. 1/-	each—s. d.
crocata , bearing racemes of large brilliant orange-scarlet flowers, remarkably showy, ht. $\frac{1}{2}$ ft. Strongly recommended for south borders, terrace vases, or pots, etc.	per 100, 15/- ; per doz. 2/3	0 3
" Prince of Orange , a very beautiful variety of <i>T. crocata</i> , bearing very freely elegant branching racemes of very large glowing orange-scarlet coloured flowers ; a fine bulbous plant for south borders, terrace vases, or for pot culture in cool greenhouse	per doz. 5/6	0 6
rosea (<i>syn. Montbretia rosea</i>), a charming graceful bulbous plant, producing in summer elegant spikes of pretty rose-coloured tubular flowers, ht. $1\frac{1}{2}$ ft. ...per 100, 7/6 ; per doz. 1/3	0 2	

TROPÆOLUM, all beautiful climbers. **Jarrattii** we recommend for the greenhouse to trail over trellises, round pillars, etc. **Polyphyllum** revels on dry sunny slopes and sunny spots on rockwork and border. **Tuberosum** requires an open sunny situation and poor soil, and should have branches to ramble over.

Jarrattii (<i>syn. tricolor</i>), flowers scarlet, orange, and black, an exceedingly showy species	per doz. 8/6	0 9
polyphyllum , golden-yellow flowers in long trusses, quite hardy	7/6	0 8
× speciosum , plant in spring ; <i>see our Spring Catalogue of Bulbs and Tubers</i> .		
× tuberosum , flowers yellow and red, very showy ; plant in Spring and lift in Autumn. The dried tubers are eaten by the natives of Peru, and in Bolivia they are boiled and then frozen, being much esteemed as a delicacy ; plant in spring ...per 100 12/6 ; per doz. 1/9	0 2	

× **TUBEROSE**. This valuable sweet-scented flower is too well known to need description. For early flowering pot the bulbs as soon as received, and plunge the pots in a temperature of about 60 degrees. Keep the bulbs for succession dry, or pot at once to make root growth ; in either case the temperature should not be below 50 degrees, or the bulbs will suffer.

Double American Dwarf, "Excelsior Pearl," the finest strain, having large pure white double flowers of delicious fragrance. *Orders booked for supply from January to May**Extra strong bulbs*, per 100, 21/- ; per doz. 3/- 0 4

BARR'S PHYTOBROMA FOR BULBS, ETC.

The best Manure for Daffodils, Hyacinths, Tulips, etc., and for flower borders generally. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in Spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. For Pots, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil.

Nett Prices—2 lb. tin, 1s. ; in bags—7 lb., 2s. 6d. ; 14 lb., 4s. 6d. ; 28 lb., 8s. ; 56 lb., 13s. 6d. ; 1 cwt., 26s. Prepaid Orders for 28 lb. and upwards sent Carriage Paid to any station in Great Britain or to any port on the Irish Coast.

BARR'S FAMOUS TULIPS

Have received the following High Awards :

Nine Gold Medals by the Royal National Tulip Society.

Two Gold Medals, Royal Horticultural Society, 1914,

Two Gold Medals, Royal Horticultural Society, 1915.

Silver-Gilt Cup at the Great Chelsea Show, May 18th, 1915.

Tulips are extremely hardy, and of easy culture, flowering freely in either sunny or shady situations, and developing their handsome showy flowers even in a confined town garden. By a judicious selection of Single, Double, and May-flowering Tulips, a most brilliant display of colours may be maintained in the garden from early April to end of May. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the Tulips **Scilla sibirica**, **Chionodoxas**, **Snowdrops**, and **Crocuses**; these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip. The **large breadths of Tulips in bloom at our Nurseries in Spring** are a sight worth seeing, and attract a great many visitors. At the Kinemacolor Theatre, London, views of our Tulip fields at Taplow, and also individual flowers, in natural colours, have recently been one of the features of the programme.

Early Single Tulips recommended for Forcing.

For full descriptions see General List of Early Single Tulips, pages 77 to 79.

When forced the colours generally come softer.

The following varieties of Early Single Tulips are the most suitable for forcing. As failure in forcing Tulips and other bulbs is generally due to bringing the pots into warmth too early or before the bulbs have rooted sufficiently, we have given on page 2 a few practical hints on general treatment which if followed will produce satisfactory results. We indicate by numbers in brackets the varieties most suitable for earliest and later forcing. The "**Duc van Thol**" Tulips are prized for their dainty little flowers but are only suitable for pots. They are remarkably early and can easily be brought into bloom before Christmas.

(1) Varieties which should be used for earliest forcing to come in at **Christmas** and **early January**.

(2) Varieties for second-early forcing to come in from **end of January** to **early March**.

(3) Varieties for later forcing to come in from **middle of March** to **early April**.

Early Single Tulips recommended for Bedding.

Full descriptions will be found in our General List of Early Single Tulips.

Culture Outdoors.—Any ordinary garden soil enriched with old stable manure, with a sprinkling of quicklime dug in while fresh, suits the Tulip. Planting out of doors should take place from *October* to *November*, not earlier. On light soils the bulbs should be planted 4 to 5 inches deep; on heavy soils 3 to 4 inches deep. Early Single Tulips should not be planted two years running on the same piece of ground.

Arrangement of Colours in Bedding.—The following varieties if bedded together produce charming effects: *Princess Marianne*, *Ophir d'Or* and *Wouverman*; *Pottebakker White* and *Chrysolora*; *Prince of Austria*, *President Lincoln* and *Chrysolora*; *Cottage Maid* and *Princess Marianne*; *Golden Queen* and *Thomas Moore Improved*; *Chrysolora* and *Dusart*; *Princess Ida* and *Rosamundi*; *Rosamundi* and *Stanley*; *Couleur Cardinal* makes a grand show bedded by itself, but *Snowdrift* goes well with it; *Keizerskroon* makes a fine bed with *La Reine* as an outside border. *Golden Queen* is a grand bedder.

Time of Flowering.—The order of flowering is indicated by (1), (2), (3), (4), or (5) after the name. The difference in time of flowering between each number is not great, so that (1) and (2) may be bedded together, also (2) and (3), and so on.

☞ For Rainbow Mixture of Single Tulips, see page 76.

Early Double Tulips recommended for Forcing.

☞ For full descriptions, see General List of Early Double Tulips.

When forced the colours generally come softer.

Generally speaking Double Tulips will not bear such early forcing as Single Tulips. The following sorts are those we recommend for the purpose. The numbers 1, 2, and 3 refer to the relative periods for which they may be forced. For general cultural directions, see page 2.

(1) Indicates those varieties which may be forced to come in the middle of January; (2) those to come in from end of January to early March; and (3) the varieties to come in at end of March and early April.

BARR'S GENERAL LIST OF DOUBLE TULIPS.

Plant from October to November.

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, etc., also as edgings to beds of Roses and Rhododendrons and to shrubberies. Planted in groups of five or more, they are very attractive. *Plant the bulbs four inches deep and four to six inches apart.*

Time of Flowering.—The numbers in brackets after the name indicate the order of flowering, and will assist amateurs in making their selections for bedding, thus:—(1) corresponds in time of flowering with (1) of the **Single Tulips**; (2) corresponds with (2) of the **Single Tulips**, and so on. The heights, as registered at our Nurseries, are given in inches. By a judicious selection of Double and Single Tulips, a display of brilliant colours may be maintained in the garden for a long period.

For Pot Culture plant three bulbs in a pot, and treat as recommended on page 2.

PARROT, or DRAGON TULIPS, with Laciniated Petals (May-flowering).

These Parrot, or Dragon Tulips, have large characteristic blossoms with curiously laciniated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets the drooping flowers look like orchids. In height they average about 15 inches, and bloom with the Cottage and Darwin Tulips.

The following are all selected extra strong bulbs, superior to what are often sold, and may reasonably be expected to bloom; but as in some seasons the Parrot Tulips are rather shy in flowering, to ensure a good display in flower beds and borders it is wise to plant the bulbs only 4 inches apart.

12 bulbs each of 6 beautiful varieties, 7s.; 6 each, 3s. 9d.

Amiral de Constantinople , glossy scarlet, shaded and tipped orange, showy	per doz.—s. d
	per 100, 7/6 1 3
Coffee-Colour , shaded reddish brown on a yellow ground, slightly striped crimson and green. <i>Inclined to sport</i>per 100, 7/6 1 3
Crimson Beauty , rich deep blood-crimson, with blackish markings, flowers of immense size and very handsome; this variety should be largely used in beds, borders, and baskets, as nearly every bulb flowers freely and produces a most brilliant effect...per 1000, 70/-; per 100, 7/6 1 3	
Fire King , a very handsome variety, flowers blood-scarlet flamed here and there with golden-yellowper 100, 10/6 1 6

Barr's Splendid Mixed , from named sorts, containing a good variety of colours	
	Strong bulbs, per 1000, 60/-; per 100, 6/6 1 0

BARR'S GRAND DARWIN TULIPS.

All Single and May-flowering.

The large breadths of these grand Darwin Tulips at our Nurseries (see illustration on back of cover) present in May a gorgeous sight and attract a great many visitors. At the Kinemacolor Theatre, London, charming pictures of our Tulip Fields at Taplow, as well as individual flowers, in natural colours, have recently been shown on the screen daily. At the Great International Exhibition, May 1912, our exhibit of Tulips was awarded a **Large Silver Cup**; the R.H.S. **Gold Medal**, May 5th, 1914; the R.H.S. **Gold Medal**, Great Chelsea Show, 1914; Two R.H.S. **Gold Medals**, 1915, and **Silver-Gilt Cup** at the Chelsea Show, 1915.

For flower beds and borders we confidently recommend these Darwin Tulips for their stately bearing and rich colours. In most cases the body colour is set off by a snowy white, brilliant blue, purple or a prettily starred centre. The varieties offered have been specially selected as being distinct, showy, and beautiful, so that buyers need have no hesitation in choosing the colours they require, as all are good. The cut flowers form an elegant decoration for vases, and last a long time in water. The lighter lilac and heliotrope-coloured varieties blend charmingly with yellow "Cottage" Tulips such as *Mrs. Moon*, *Vitellina*, *Gesneriana lutea*, *lutea pallida*, *Inglecombe Yellow*, and *flava*, etc. Most of these Tulips may be successfully grown in our **Peat-fibre Mixture**, and afford a delightful decoration for indoors (see **Cultural Directions**, page 3).

On heavy soil the bulbs should be planted 5 to 6 inches deep, and on light soils 6 to 7 inches.

By gentle forcing in pots these grand Tulips may be had in bloom by the middle of March, and will be found of great value for indoor decoration on account of their lovely soft colours and tall stately bearing, the centres of many are most beautifully marked. The best varieties for this purpose we have indicated by an *

In most cases we give the heights as registered at our Nurseries, also the order of flowering in relation to the flowering period of the **Cottage Tulips**, (1) being the first to open and (5) the latest.

BARR'S

Beautiful May-Flowering "Cottage" Tulips.

Awarded Silver Cup

at the Royal International Exhibition 1912, and at the Great Chelsea Show 1913, Gold Medal at the R.H.S. Tulip Show May 5th, 1914, and the R.H.S Gold Medal at the Great Chelsea Show May 19th, 1914. Two R.H.S. Gold Medals, May, 1915, and R.H.S. Silver-Gilt Cup, Chelsea Show, 1915.

The name **Cottage Tulips** we have given to the various beautiful May-flowering Tulips which have mostly been found growing in old cottage gardens in England, Scotland, and Ireland, where they have been in some cases for over fifty years. Some have also been traced to old French gardens. They are all very beautiful, presenting a great variety in form and colouring, and having none of the stiffness of other Tulips. We have also included in this section a few fine **Dutch Breeder** or **Self-Coloured Tulips** which have up to now been erroneously classed with the Darwin Tulips. For cutting they are greatly prized on account of their long stems and graceful habit. Being extremely hardy they are specially adapted for permanent hardy flower borders, where they should be freely planted in large clumps and masses. They may also be naturalised in grass, wild gardens, etc., where during May they present a charming picture. Those who have visited **Kew Gardens** in Spring will have noticed these Tulips planted freely in grass, and also used largely in *filling flower beds* on the lawns. Most Cottage Tulips may be grown with great success in bowls of **Barr's New Peat-fibre Mixture**, and afford a delightful decoration for indoors (see page 3).

TULIPS, MAY-FLOWERING COTTAGE—continued.

Culture.—The bulbs should be planted 5 to 6 inches deep on heavy soils, and 6 to 7 inches deep on light soils. If planted too shallow they are apt to come blind.

In most cases we give the heights as registered at our Nurseries, but these will vary somewhat according to richness or poverty of soil.

Time of Flowering.—The Cottage Tulips take up the succession of flowering as the Early Single and Double Tulips are going out of bloom. As far as possible we have indicated the order of flowering by (1), (2), and so on. (1) will correspond in time of flowering with (5) of the Early Single and Double Tulips. The Parrot Tulips bloom together with those marked (2), and the Darwin with those marked (3) and (4) in the following lists.

The prefix * indicates those Tulips which may be had in bloom about the middle of March by gentle forcing in pots.

OLD DUTCH TULIPS.

These contain many beautiful art shades of colour, and can be recommended for the flower border, being mostly tall strong growers.

	per doz.
	s. d.
Old Dutch Breeder or Self-Coloured Tulips, mixed , flowers large and hand-some, of somewhat sombre but charming self colours	per 100, 8/6 1 3

BARR'S "Gold Medal" ENGLISH FLORIST TULIPS.

Awarded Eight Gold Medals by the Royal National Tulip Society.

These beautiful May-flowering English Tulips have been prized by all lovers of the true Florist's Flower for over a century. They differ from the Old Dutch Tulips in the greater refinement of their flowers, which are of perfect goblet form, while in the case of the feathered and flamed forms the markings are beautifully symmetrical. All have clear centres. They are specially recommended for select borders and to cut for the exhibition table.

CULTURE OF ENGLISH TULIPS.—Any good loamy garden soil suits the "English Tulip." The bulbs should be planted four inches deep and four inches apart, from the end of October to middle November, choosing a day when the ground is in nice friable condition; avoid planting when the ground is wet.

ENGLISH FLORIST TULIPS—continued.

HINTS TO EXHIBITORS AND TULIP AMATEURS.—As the English Tulip often suffers much from hail and wind during Spring, it is a good plan, when choice named sorts are grown, to erect over the bed a skeleton framework on which a covering of calico or white canvas is fastened in February or March, leaving the sides open till the buds show colour, when the covering may be brought down over the sides too. By this means hail, rain, and very hot drying sun are kept off, and the flowers open in all their purity, while the period of flowering is prolonged by some weeks.

To those who wish to know all about the **English Tulip**, we recommend "The English Tulip," a little pamphlet containing the lectures delivered on this flower at the great Tulip Conference of the Royal National Tulip Society, held at *Royal Botanic Society's Gardens*, May 12th, 1897, price 1s.

BARR'S SELECTIONS OF ENGLISH FLORIST TULIPS.

3 each of 25 Beautiful Varieties, *Bizarres*, *Byblæmens*, and *Roses* 21/-, 30/-, & 42/-
3 " " 12 " " " " 10/-, 15/-, & 21/-

In the above collections the **Bizarres** embrace the following colours,—self shades of red, crimson, scarlet, maroon, and chestnut, also flakings of orange, scarlet, crimson, brown, and black, on a lemon or golden-yellow ground; in all cases the centres are clear lemon or rich yellow. The **Byblæmens** are made up of self shades of purple, violet, lilac, and heliotrope, also beautiful flakings of black, violet, purple, and lavender, on a clear white ground, all having a dazzling white centre. The **Roses** contain lovely self shades of rose and rose-scarlet, and also pretty flakings of delicate pink, soft rose, glowing scarlet, and deep crimson on a pure white ground, all having a clear white centre.

CHOICE NAMED VARIETIES OF ENGLISH TULIPS.

Bizarres, Byblæmens, and Roses.

In the following descriptions "breeder" indicates the self-coloured or seedling form, and "feathered" or "flamed" where the self colour has broken into a variegation. A "breeder" Tulip may at any time break into a **feathered** or **flamed** variegation.

BARR'S OLD ENGLISH TULIPS.

Choice Mixture, all with flamed and feathered flowers in great variety of colour. When massed in beds and borders these Tulips present a charming pictureper 100, 21/- 3 0... —

RARE AND BEAUTIFUL SPECIES OF TULIPS.

The following Tulips are all wild species, and many of them rare. They are all beautiful, and will be highly appreciated by lovers of hardy bulbous plants. Their right place is the rock garden, where their flowers are seen to advantage, especially the dainty small species like **Batalini**, **Chrysanthia**, **Clusiana**, **Persica**, **Saxatilis**, etc.

	per doz.	each

VALLOTA <i>purpurea</i> (The Scarborough Lily),	a most valuable Autumn-flowering cool greenhouse plant, producing on stout stems umbels of 5 or more large brilliant scarlet flowers which open in succession, thus remaining decorative a long time. It may be planted out of doors in May, and when in bud potted up for greenhouse or sitting-room decoration.	each s. d.
	Established in pots	per doz. 15/-; each 1/6; Extra strong, per doz. 27/6 2 6
	Strong single bulbs (dry)	,, 10/6 1 0
WATSONIA (Bugle Lily),	very ornamental and showy bulbous plants, which may be grown in pots for the cool greenhouse or be planted outdoors in a warm sunny situation. The plants must be supplied with abundance of water whilst in growth and flowering.	
Ardenei ,	the Large Snowy White Bugle Flower of South Africa, a most lovely plant for pots in cool greenhouse, or for sunny warm situations out of doors; in early summer it throws up graceful branching spikes 3 to 4 ft. high, with very elegant glistening snowy white flowers of great substance. If the top spike is removed when the flowers are fading the buds on the lower spikes rapidly develop, and a decoration is thus maintained for two months. When the plants are in full growth the pots should be kept in saucers of water. To maintain a succession of flowers pot up at intervals from September to November. If planted outdoors give a light covering of dried heather during winter. FIRST-CLASS CERTIFICATE R.H.S.	per doz. 5/6 0 6
coccinea ,	bearing in Summer handsome spikes of bloom of a gorgeous vermillion colour, on a reddish brown stem, ht. 1 ft.	per doz. 5/6 0 6

MANURES, SOILS, PEAT-FIBRE, etc.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. For Pots, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. 2-lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 8/-; 56 lb. 13/6; 1 cwt. 26/-.

Barr's Improved Peat-fibre, Shell, and Charcoal Mixture for growing Bulbs in Bowls, Jardinettes, Glasses, etc. Specially recommended for Hyacinths grown in glasses: half fill the glasses with the preparation, and add water till no more can be absorbed. Place the bulb so as to rest the base on the preparation, and tie it down with brown paper, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept wet. The same remarks apply to bulbs grown in bowls, etc.: they must be kept in place till they have rooted. Our Fibre Mixture is sent out ready for use. 3/6 per bushel; 1/- peck.

Basic Slag, per cwt. 15/-; per 14 lb. 2/6.

Bone Meal (*Genuine fine Crushed Bones*), best quality, per cwt. 20/-; per 7 lb. 1/6.

Pure Dissolved Bones, best quality, per cwt. 20/-; per 7 lb. 1/6.

Sulphate of Potash (*now very scarce*), per 14 lb. 7/-; per 7 lb. 3/9.

“ “ **Ammonia**, per cwt. 25/-; per 28 lb. 8/6; per 3 lb. tin, 1/3.

Nitrate of Soda, per cwt. 25/-; in tins, 8d., 1/3, and 3/- each.

Vaporite, for destroying Wireworm, Woodlice, and other injurious insect life in soil, small tin, 9d.; 7 lb. tin, 2/-; 28 lbs., 4/6; 1/2 cwt., 7/6; 1 cwt. 11/6. Full particulars on application.

Loam, Peat, Leaf Soil, Silver Sand, each, per bushel, 2/6.

Lime, fine ground, per bushel, 3/-.

Barr's Specially Prepared Potting Soil, containing a suitable quantity of *Phytobroma*, per bushel, 2/6.

Peat-fibre, recommended in preference to Cocoa-fibre for plunging bowls, pots, etc., and as a winter mulch to bulb-beds, etc., per bushel, 1/6.

Small Pebbles and Charcoal, suitable for growing Hyacinths, etc., in bowls and vases without drainage, 6d. per quart; 3/6 per peck.

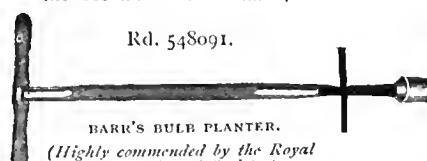

Charcoal (fine twig), per peck, 1/-; per bushel, 3/6.

Fresh Sphagnum Moss, 3/6 per bushel.

USEFUL TOOLS FOR BULB PLANTING, Etc.

Barr's Special Bulb Planter, specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf, which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have

been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early Autumn rains, and not when in a hard and baked condition, as it is then impossible to use this, or indeed any other tool with success. By the use of **BARR'S SPECIAL BULB PLANTER** a large quantity of

Rd. 548091.

BARR'S BULB PLANTER.

(Highly commended by the Royal Horticultural Society.)

bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup:—To cut out a circular hole 2 inches diameter }
 “ “ “ 2½ “ “ } 10/6 each.
 “ “ “ 2½ “ “ }

We shall send the medium size (2½ in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber, specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6½ lbs., length 36 inches over all. 9/6 each.

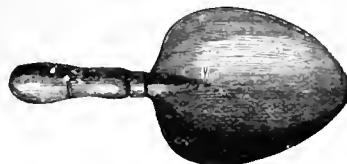

BARR'S BULB DIBBER.

BARR'S BULB DIBBER,
36 in.

New Pattern Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring when Bulbs are just showing; also a useful weeding tool. With 3 ft. handle (41 inches over all and weight under 1 lb.), 2/3 each, with short handle (12½ inches), 1/6 each.

(Commended by the R.H.S., 1914.)

USEFUL TOOLS, ETC.—continued.

BARR'S BULB TROWEL.

Barr's Special Bulb Trowel, made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 2/9 each.

Garden Trowel, solid cast steel, finest quality, 5 in., 1/4; 6 in., 1/6; 7 in., 1/9 each.

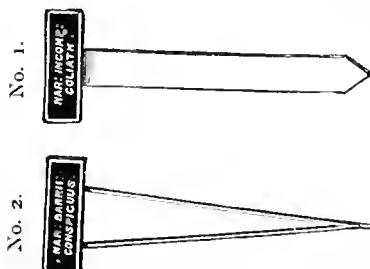

Hand Fork, finest quality, solid steel with three 4½ inch solid flat prongs and 5 inch handle, a very superior tool, 1/9 each.

The Caxton Cultivator (Commended by the R.H.S., 1914), invaluable for breaking surface soil in Spring and Summer, 3-prong, with 4 ft. handle, 3/9 each.

The Cuma Cultivator, similar to the Caxton, but with a 21-inch handle, 1/6 each.

Hybridising Tweezers, suitable for easily removing pollen from Daffodil flowers, per pair, 2/6. **Glass Pollen Tubes**, 1/- per doz.

GARDEN LABELS.

BARR'S
SPECIAL METAL LABELS FOR BULBS, Etc.
With Raised Lettering.

No. 1, with solid metal shank, about 9 inches long. We specially recommend this for beds and borders. per doz. 4/-.

No. 2, with stout wire stem, 6 or 9 inches long; specially suitable for pots, etc. (in ordering please state whether a short or long stem is required). per doz. 3/6.

No. 3, for suspending, per doz. 3/6.

NOTE The above prices include the stamping of any name required.

These labels are only made to order, the time taken to execute an order being generally from 2 to 3 weeks.

Labels, Wooden, for pots, etc., painted white, superior quality, packed in boxes of 100 each.

4 in.	5 in.	6 in.	7 in.	8 in.	9 in.	12 in.
8d. ...	10d. ...	1/- ...	1/3 ...	1/6 ...	2/- ...	3/- per 100.

“ “ very stout, best yellow deal, planed and pointed, tarred bottoms, 14 in. long, 1½ in. wide, ½ in. thick, same as we use at our Nurseries. If painted with ordinary white paint, using raw linseed oil, and written on while paint is wet with Wolff's indelible ink pencil, will last 3 to 4 years, per 100, 14/6; per doz., 2/-.

Ivo Labels, the most suitable label for naming Daffodils at Exhibitions, made of ivory celluloid, and printed with indelible black letters. Any name supplied to order. 1/6 per dozen.

We have secured a few copies of the 1913 Daffodil Year Book (now out of print); we can offer while stock lasts at 7/6 each.

BULB VASES AND BOWLS,

for growing Spring-flowering Bulbs in Barr's Peat-fibre Mixture.

The vases are of elegant shape, and without drainage holes, thus saving the use of saucers. They will be found most useful for Daffodils, Hyacinths, Tulips, Crocuses, Early Scillas, Snowdrops, Chionodoxas, Lily of the Valley, etc., either for table decoration or the greenhouse. During Summer they may be used for standing little pot-plants in and other table decorations.

HYACINTH GLASSES.

Plain colours or Fancy Designs, 6d., 8d., 10d., 1/-, to 1/6 each;
per doz. 7/6, 9/6, 11/6, to 16/6.

Wire Supports (brass), 4/6 per doz.

BARR'S NEW PEAT-FIBRE, SHELL, AND CHARCOAL MIXTURE.
Ready mixed for use.

A specially prepared Mixture suitable for growing bulbs in vases, bowls, jardiniets, etc. A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by the use of our **Peat-Fibre, Shell, and Charcoal Mixture**; the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to soil where bulbs are grown in bowls or vases.

Per Bushel, 3s. 6d.; per Peck, 1s.

Inexpensive

Bulbs and Plants for Naturalising
in Shrubberies, Wild Gardens, Woodlands, Grass, etc.

For Hints on Planting and Arranging see page 4.

§ indicates those flowers which will thrive in shady places, under trees, on shady banks, etc., or may be planted in the open border.

* indicates those bulbs, etc., which are essentially wood plants, and should only be grown in shady situations.

For full descriptions see body of Catalogue.

BARR'S SPECIALLY SELECTED Dried Marrowfat Peas

For Autumn, Winter, and Spring Table Use.

These Peas are SPECIALLY SELECTED for cooking, and if treated according to directions make almost as good a dish as freshly gathered peas. They are far superior to the dried peas offered for sale in many grocers' shops, and we can strongly recommend them to our customers.

PER PACKET, 8d. (Post free, 11d.)

PER DOZEN PACKETS, 7s. 6d. (Carriage Paid, 8s. 6d.)

Full directions for cooking supplied with each packet.

Each packet will make a dish of Peas sufficient for 6 people.

Special Notices and Terms of Business.

FREE CARRIAGE OF BULBS.

ALL ORDERS FOR BULBS to value **20s.** and upwards sent **Carriage Paid** to any Railway Station in the United Kingdom.

PREPAID ORDERS FOR BULBS to value **10s.** and upwards sent **Carriage Paid** to any part of the United Kingdom.

5% Cash Discount on Bulb Orders of 20s. and upwards.—1s. in the £ discount is allowed for Cash with Order (*with the exception of the special Collections offered on pages 7, 8 and 12, which are strictly *nett**), and this may be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order. The same discount may also be deducted from all Bulb Accounts of 20s. and upwards when paid within 14 days from date of invoice (*excepting Collections offered on pages 7, 8 and 12, which are *nett**).

Terms of Credit.—Our books are made up half-yearly, when all accounts are due *nett*.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed “London County and Westminster Bank.” Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.*

Catalogues.—Our Seed Guide is published in January, Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting in January, Hardy Plant Catalogue 1st of March, Daffodil and General Bulb Catalogues in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Nurseries at Taplow, Bucks.—Visitors are invited during March, April, and May to see our magnificent Collections of Daffodils and Tulips in flower; and during Summer and Autumn Herbaceous Plants, Alpines, and many rare and beautiful Bulbous Plants. The Nurseries are adjoining the main line of the Great Western Railway, and are entered from the Bath Road within quite a short distance of **Taplow Station**. Cab rank at Taplow Station.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

Notices to our Foreign and Colonial Customers.

Prepayment necessary.—Owing to the expense incurred in collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an “order to pay”* on a London Bank or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Cash Discount 5%.—In the case of Prepaid Orders to value of 20s. and upwards we allow a discount of 1s. in the £ from the amount of **Bulbs** ordered, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the order.

Carriage.—No allowance for Carriage can be made in the case of Foreign Orders; the extra attention necessary precludes any kind of allowance in this respect.

Packing.—A moderate charge will be made where special materials have to be used, such as Sphagnum Moss, Oil-Silk, or hermetically sealed tin cases, and where any special packing necessitates a great deal of labour (as in the case of some Plant Orders), when out-of-pocket expenses only will be charged.

Parcel Post Rates.—AUSTRALIAN COMMONWEALTH, including TASMANIA and NORFOLK ISLAND (*P. & O. and Orient Lines direct*): 6d. per lb. (1s. for the first lb.).

NEW ZEALAND: under 3 lb., 1s.; 7 lb., 2s.; 11 lb., 3s. Nearest port of entry should be stated.

UNION OF SOUTH AFRICA (CAPE, NATAL, ORANGE FREE STATE, TRANSVAAL), 9d. per lb.

INDIA (*P. & O. Line direct*): Under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s.

CANADA: under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s.

JAPAN (*via Canada*, 26 days to Yokohama): Under 3 lb., 2s.; under 7 lb., 3s.; under 11 lb., 4s.

CHINA (*via P. & O. Line direct*): Under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s.

UNITED STATES of America. Under 3 lb., 1s. 3d.; under 7 lb., 2s. 3d.; under 11 lb., 3s. 3d.

Shipping, etc.—In Shipping Bulbs and Plants to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in successfully preparing and shipping Seeds, Bulbs and Plants to India and the Colonies extends over a long period.
